

ISSMGE BULLETIN

We are taking a new look! Launching the new Bulletin!

My dear colleagues in the ISSMGE family

The *new look* bulletin was released on March 20th, 2024, with an exciting first issue of volume 18 (after 17 years), and can be viewed on our website [here!](#) It took the modern form of an e-magazine with easy page flipping, popup photos, enclosed videos, and more... I am hereby inviting every member society, corporate associate, board level committee, technical committee, and of course members of the board, to send their articles about their activities and events to publish in our next bulletin issue that will be out by the end of June 2024.

Your participation, insights, experiences, and leadership in geotechnical engineering are invaluable to our community and to the success of our new bulletin..

Please submit your articles by June 15th, 2024, to the ISSMGE Bulletin Team :

bulletin@issmge.org

Thank you for your continued commitment to promoting our geotechnical engineering profession.

Warm regards,

Dr. Marc Ballouz
President ISSMGE
