Ezra Tjung, Ph.D., P.E.
Senior Engineer
Civil & Structural Engineering

• Ph.D. and M.S. University of California, Berkeley
• B.Eng. Hong Kong University of Science and Technology
• Professional Engineer California, Texas, and Indonesia
• Lecturer Calvin Institute of Technology, Jakarta, Indonesia
...the biggest debates are over what we should teach in them. Should the programs teach individuals to think critically, explore, challenge concepts, and debate constructively? Or should they focus on the technical and trade skills needed in the workplace? The debate also extends to what level federal and state governments should be involved in financing schools and universities.

Four Personal Teaching Observations
1. Demonstration is powerful
