Call for Papers for Special Issue on Geoenvironmental Engineering Case Histories

ISSMGE International Journal of Geoenvironmental Engineering Case Histories

TC 215 on Environmental Geotechnics is pleased to announce a Call for Papers for Case Histories in Geoenvironmental Engineering that will be published in ISSMGE's [International Journal of Geoenvironmental Engineering Case Histories](#). Well-documented case histories with detailed site characterization data and monitoring data to assess field performance are particularly welcome. Case histories may relate to:

- Landfills and bioreactors
- Heap leach pads and impoundments, tailings facilities
- Barrier systems
- Sediment dredging, capping and remediation
- Soil and ground water remediation
- Slopes, dikes, and embankments or ground improvement associated with Geoenvironmental problems
- Biotechnologies
- Disaster waste management
- Successful reuse of residual, or recycled materials
- Waste to energy
- Nuclear waste containment

Interested authors are encouraged to submit a 300-word abstract **by 31 October 2016** to Prof. Abdelmalek Bouazza malek.bouazza@monash.edu and/or Prof. Dimitrios Zekkos zekkos@geoengineer.org

Authors will be notified shortly after about the acceptance of their abstract. Submission date of full papers is 15 January 2017. Please consult the Journal's submission guidelines <http://casehistories.geoengineer.org/submission.html> before you'll submit your paper. All papers will go through a peer-review process. **Publication of this special issue is expected in June 2017.**
