

**ISSMGE FOUNDATION  
REPORT ON CONFERENCE ATTENDANCE**

<b>Your Name:</b> Oleksii Dytiuk	<b>Your Organization:</b> Kharkiv National University of Civil Engineering and Architecture	<b>Date of report:</b> 10.09.2022
<b>Conference Title:</b> 11th International Symposium on Field Monitoring in Geomechanics	<b>Location of Conference:</b> <b>Imperial College London</b>	<b>Dates of Conference:</b> <b>04.09.2022-</b> <b>08.09.2022</b>
<b>What you learned:</b> I have learned new methods of installing devices for monitoring and obtained data that are collected from these devices. It was a good experience because I saw some new appliances, how they were installed on-site and how they work.		
<b>People you met:</b> I have met many new people interested in building and geotechnical monitoring, such as Pierre Choquet, Jan Couck, Gianfranco Nicodemo, Catarina Santos, Holger Worshing, Cris Grudniewicz, Skevi Perdikou and many others with whom we have a conversation.		
<b>Main features of conference:</b> I like this symposium, because for me, as for a student, it is very important to take as much information as possible from all of these smart people who have attended it. It is very cool when after your presentation or presentation of another participant you can have a discussion with people who have many years of experience in the building sphere.		
<b>Your comments on the conference:</b> I'm very excited to be on this symposium, because it gave me many new pieces of information about monitoring systems. I like that I have many contacts with people who are interested in monitoring. The symposium was held on a higher level.		

**Please attach short report (maximum 400 words) suitable for publication in the ISSMGE Bulletin:**

I'm very exciting were on this symposium, because it gave me many new information about monitoring systems. I like that I have a many contacts with people, which are interested in monitoring. I like this symposium, because for me, as for student very important to take as many information as it possible from all of this smart people which has attend it. It very cool when after your presentation or presentation of another participation you can have a discussion with people which have many experience in building sphere. Symposium was made on a higher level and I will recommend all my colleague from Ukraine visit next Symposium which will be in India in 2026.
