| Dirceu de Alencar VELLOSO | Brazil |
| Narimantas ZDANKUS | Lithuania |

PREFACE

These proceedings represent the collection of 32 articles from 15 different countries. Many people have contributed to this book and I wish to acknowledge them all. Professor Ishihara (Japan) is the President of the International Society of Soil Mechanics and Geotechnical Engineering (1997-2001). In 1998, he accepted a proposal to create Technical Committee no. 33 on Scour of Foundation (TC-33). I appreciate his vote of confidence. In 1999, the TC-33 committee decided to organize a series of events. In 2002, the TC-33 committee plans to organize the First International Conference on Scour of Foundations at a site to be determined. In 2001, the TC-33 committee will organize a workshop at the occasion of the International Conference on Soil Mechanics and Geotechnical Engineering to be held in Istanbul in August.

These are the proceedings of the International Symposium on Scour of Foundations to be held in Melbourne, Australia on November 19, 2000. Professor Safiullah (Bengladesh) is the Chair of the Organizing Committee and Professor Melville (New Zealand) is the Co-Chair. I wish to thank Professor Safiullah, Professor Melville and the members of the organizing committee for a job well done.

As editor of these proceedings, I wish to thank the authors for their contributions and for their timely paper-submittal. As chair of the International Society of Soil Mechanics and Geotechnical Engineering Technical Committee 33 on Scour of Foundations, I wish to thank all the members of the committee for their help over the last two years. Many of the committee members have contributed papers to this Symposium. I also wish to thank Mrs. Kelli Perry and Mrs. Kelly Smith on our staff, for all their help with the TC-33 committee work in general and the preparation of these proceedings in particular. Finally, I wish to acknowledge the Spencer J. Buchanan Professorship at Texas A&M University for financially supporting the TC-33 committee work and the preparation of these proceedings.

The International Society of Soil Mechanics and Geotechnical Engineering Technical Committee 33 on Scour of Foundations has the following objectives:

- 1) To promote and enhance professional activities in geotechnical engineering related to scour of foundations in general and scour at bridges in particular.
- 2) To sponsor sessions on scour of foundations at future ISSMGE international and regional conferences.
- 3) To promote international co-operation in research and dissemination of research results on scour problems.
- 4) To develop international guidelines for scour design, monitoring, and countermeasures.
- 5) To facilitate the development of an electronic data base of failures and successes.

It is hoped that the work of this committee including events like the one which lead to these proceedings will help improve the knowledge on scour of foundations and give engineers of all countries better tools to solve this major civil engineering problem.

College Station
June 23, 2000

Jean-Louis Briaud
Chair, ISSMGE-TC-33
Editor, ISSF proceedings

TABLE OF CONTENTS

DESIGN AND PREDICTIONS

| Bridge Scour | Page |
|---|-------------|
| Laboratory Study and Field Investigation of Scour Around Bridge Pier in Bangladesh M R Kabir, I M Faisa, Fahmida Khatun (Bangladesh) | 1 |
| Scour Depth – Prediction and Practice B.R. Phani Kumar (India) | 13 |
| The SRICOS Method: A Summary J.-L. Briaud, H.-C. Chen, K. Kwak (USA) | 16 |
| Prediction of Bed Liquification and Local Scour Around a Bridge Pier Under Abrupt Water Pressure Change Md. Faruque Mia, Hiroshi Nago (Japan) | 23 |
| Scour of Rock and Other Earth Materials at Bridge Pier Foundations George W. Annandale, Steven P. Smith, Tamara Butler (USA) | 38 |
| Sizing Riprap to Protect Against Local Scouring at Bridge Piers Christine S. Lauchlan, Bruce W. Melville, Stephen E. Coleman (New Zealand) | 60 |
| Total Scour Depth at Bridge Abutments Stephen E. Coleman, Bruce W. Melville, Christine S. Lauchlan (New Zealand) | 69 |
| Laboratory Apparatus | |
| The EFA, Erosion Function Apparatus: An Overview J.-L. Briaud, H.-C. Chen, F.C.K. Ting (USA) | 80 |
| A Laboratory Method to Evaluate the Rate of Water Erosion of Natural Rock Material Matthew R. Henderson, D. Max Sheppard, David Bloomquist (USA) | 87 |
| Other Scour Problems | |
| Towards Predicting Time Development of Local Scour Around Offshore Pipelines Fangjun Li, Liang Cheng (Australia) | 103 |
| Experimental Study of the Scour on the Seabed Under a Pipeline in Oscillating Flow Pu Qun, Li Kun (China) | 118 |
| Scour Potential Evaluated in Terms of Excess Pore Pressure Induced | 131 |

| | |
|--|-----|
| By Ocean Waves | |
| Kouki Zen, Kiyonobu Kasama (Japan) | |
| Scour Downstream of Dams | 142 |
| George W. Annandale, Rodney Wittler, Greg A. Scott (USA) | |
| Evaluation of General Scour | 171 |
| José Antonio Maza-Álvarez (Mexico) | |
| Flow Angle of Attack at Perpendicular Bridge Crossings | 186 |
| Marco Falcón, Mauro Nalesso (Venezuela) | |
| Predicting the Magnitude and Position of Maximum Scour Depth | 198 |
| Downstream of Culvert Outlets Using Artificial Neural Networks | |
| S.L. Liriano, R.A. Day (UK) | |

PRACTICE AND CASE HISTORIES

International Practice

| | |
|---|-----|
| Some Aspects of the Argentine Experience on Local Scour | 210 |
| Raúl Antonio Lopardo (Argentina) | |
| Bridge Scour Problems in Korea | 219 |
| Tae Hoon Yoon, Soo Sam Kim, Gye Woon Choi, Sangseom Jeong (Korea) | |
| Bridge Scour Evaluation in the United States | 230 |
| E.V. Richardson, J.R. Richardson, P.F. Lagasse (USA) | |
| Scour in Sudan: Practice and Problems | 265 |
| Yahia E-A. Mohamedzein, Assim El Sanosi (Sudan) | |
| Setting Train Suspension Rules on the Bridges Prone to Scour in | 273 |
| Consideration with River-Bed Characteristics | |
| Junichi Tanaka, Masanori Mikami (Japan) | |
| New Zealand Reflections on Bridge Scour | 286 |
| Stephen E. Coleman, Bruce W. Melville Christine S. Lauchlan (New Zealand) | |
| Local Scouring and Scour Countermeasure in Malaysia | 297 |
| Yee-Meng Chiew, See-King Ng, Siow-Yong Lim (Singapore) | |

Inspection and Monitoring

| | |
|---|-----|
| Bridge Inspection for Scour Vulnerability | 310 |
| E.V. Richardson, J.R. Richardson, R.F. Lagasse (USA) | |
| Development of New Scour Monitoring Devices for Railway Bridges | 329 |
| Osamu Suzuki, Makoto Shimamura (Japan) | |
| Real-Time Bridge Scour Assessment and Warning | 337 |
| Jeffrey M. Di Stasi, Carlton L. Ho (USA) | |

Countermeasures

| | |
|--|-----|
| Protection of the Hutt Estuary Bridge Against Local Scour Christine S. Lauchlan, Bruce W. Melville, Stephen E. Coleman (New Zealand) | 353 |
| Hydraulic Properties of Concrete Blocks For Bed Protection Sung-Uk Choi, Joongcheol Paik, Woncheol Cho (Korea) | 361 |
| The Problem of Scour and Countermeasures B.R. Phani Kumar (India) | 369 |
| Shear Stress Concept in Granular Filters Gijs J.C.M. Hoffmans, Henk den Adel, Henk J. Verheij (The Netherlands) | 372 |

Case Histories

| | |
|--|-----|
| Influence of Reservoir on River Bed Scour Narimantas Zdankus (Lithuania) | 380 |
| Bealey Bridge Scour Failure Stephen E. Coleman, Bruce W. Melville, Christine S. Lauchlan (New Zealand) | 387 |
