

CONTENTS

Editorial by M. Maugeri

General Reports:

Evaluation of geotechnical aspects of EC8, by Maugeri M. and Papadimitriou A.

PART 1: GROUND CONDITIONS, SEISMIC ACTIONS, RESPONSE SPECTRA, TOPOGRAPHIC AND VALEY EFFECTS.

Chapter 1 - *Site Response from Istanbul Vertical Arrays and Strong Motion Network, by Ansal A., Kurtuluş A., Tönük G.*

Chapter 2 - *Local seismic response analyses in a landslide area of the northern Appenine, by Facciorusso J., Madi ai C.*

Chapter 3 - *Identification of ground types for the definition of the seismic action using V_s vs. N_{SPT} or c_u , by Monaco P.*

Chapter 4 - *Topography effects on peak seismic acceleration at the ground surface of hills, canyons and slopes, by Papadimitriou A.*

Chapter 5 - *Numerical evaluation of basin effects on peak seismic acceleration at the ground surface, by Papadimitriou A., Tetta Z., Mellios M.*

Chapter 6 - *New soil classification system and spectral amplification factors for EC8, by Pitilakis K., Anastasiadis A., Riga E.*

PART 2: NEAR FIELD EFFECTS AND PROXIMITY TO SEISMIC ACTIVE FAULT.

Chapter 7 - *Ground surface distortion zone in the vicinity of active dip-slip faults*, by: Loukidis D., Papadimitriou A., Bouckovalas G.

Chapter 8 - *Adequacy assessment of damping coefficients in seismic code provisions for near-fault ground motion response spectra*, by: Mavroeidis G. P. and Hubbard D. T.

Chapter 9 - *Effect of soil conditions on the characteristics of near-field ground motions*, by: Psycharis I. N., Sideri. M., Taflampas I. M.;

PART 3: DYNAMIC GROUND PROPERTIES.

Chapter 10 - *Shear wave profile measurements by Seismic Dilatometer Marchetti Test (SDMT)*, by Cavallaro A., Grasso S. and Maugeri M.

PART 4: SLOPE INSTABILITY.

Chapter 11 - *Discussion and suggestions on design code provisions for seismic stability analyses of artificial slopes*, by Madias C. and Vannucchi G.

Chapter 12 - *Re-evaluation of the slope stability pseudo-static method of analysis*, by Salgado F. M.

Chapter 13 - *Displacement-based design of slopes*, by: Stamatopoulos C., Taskaris N., Thomaidis T.

Chapter 14 - *On the design of a medium-size earth-fill dam*, by: Tolis S. V.

Chapter 15 - *Seismic slope stability of embankments: a comparative study on EC8 provisions*, by: Zania V., Tsompanakis Y., Psarropoulos P.

PART 5: LIQUEFACTION.

Chapter 16 - *Soil Liquefaction in the Achaia-Ilia, Greece, Earthquake (2008) – Field Evidence, Simplified Analyses and EC-8 Provisions*, by Batilas A. V., Pelekis P. C., Vlachakis V. S., Pefani E. T. and Athanasopoulos G. A.

Chapter 17 - *Effect of preloading on the cyclic liquefaction strength*, by Stamatopoulos K. and Balla Stamatopoulos L.

PART 6: SHALLOW FOUNDATIONS.

Chapter 18 - *Effect of Clay Crust on Seismic Liquefaction Performance of Surface Foundations*, by Karamitros D., Bouckovalas G., Chaloulos I.

PART 7: PILE FOUNDATIONS.

Chapter 19 - *Winkler springs and dashpots for dynamic pile-soil interaction*, by Anoyatis G. and Mylonakis G.

Chapter 20 - *Some Remarks about Eurocode and Italian code about piled foundations in seismic area*, by Di Laora R. and Mandolini A.

Chapter 21 - *Soil-pile kinematic interaction in a homogeneous deposit within a midway layer is located*, by Grassi F. and Massimino M. R.

Chapter 22 - *Soil-pile kinematic interaction: new perspectives from recent analyses*, by Simonelli A. L., Sica S., Cairo R., Mylonakis G.

PART 8: RETAINING STRUCTURES.

Chapter 23 - *On the evaluation of pseudo-static passive earth pressure in EC8-5*, by Foti S., Lancellotta R.

Chapter 24 - *Analysis of seismic earth pressures: some recent developments*, by Kloukinas P. and Mylonakis G.

Chapter 25 - *Seismic active earth pressure: the effect of soil dilatancy angle*, by Loukidis D. and Konstantinopoulos D.

Chapter 26 - *On the design of embedded retaining structures following Eurocodes and the Italian national code*, by Pane V., Cecconi M., Cattoni E.

Chapter 27 - *Issues on the dynamic response of retaining structures*, by: Psarropoulos P., Papazafeiropoulos G., Tsompanakis Y.

PART 9: NEW THEMES.

Chapter 28 - *Seismic performance based design for reinforced earth structures*, by Carrubba P.

Chapter 29 - *Shell theory analysis of pipelines under seismic S & R wave action*, by Kouretzis G., Bouckovalas G., Karamitros D.

Chapter 30 - *Seismic performance of landfills*, by Maugeri M., Zekkos D, Castelli F.

Chapter 31 - *The link between EC7 and EC8 in the seismic design of an anchored sheet pile wall*, by Scarpelli G., Fruzzetti V.M.E, Ruggeri P., Sakellariadi E., Segato D

Chapter 32 - *Mechanical behaviour of Buried Steel Pipelines crossing strike-slip Seismic Faults*, by Vazouras P., Dakoulas P., Karamanos S. A.
