PBD-III Vancouver 2017

3rd International Conference on Performance-based Design in Earthquake Geotechnical Engineering

The papers in these proceedings were prepared for presentation at the 3rd International Conference on Performance-based Design in Earthquake Geotechnical Engineering (PBD-III Vancouver 2017) in Vancouver, British Columbia, Canada, from July 16-19, 2017. The PBD-III Vancouver 2017 Conference was organized under the auspices of the International Society of Soil Mechanics and Geotechnical Engineering – Technical Committee TC203 on Earthquake Geotechnical Engineering and Associated Problems (ISSMGE-TC203). The PBD-I and PBD-II events in Japan (2009) and Italy (2012), respectively, were highly successful events for the international earthquake geotechnical engineering community. The PBD events have been excellent companions to the International Conference on Earthquake Geotechnical Engineering (ICEGE) series that TC203 has held in Japan (1995), Portugal (1999), USA (2004), Greece (2007), Chile (2011), and New Zealand (2015).

Upon completion of the review process, papers were accepted for the conference technical sessions, and in turn, for publication in the proceedings herein. The proceedings committee received over 442 abstracts leading to the 238 papers accepted for publication in the Proceedings. Technical sessions included keynote presentations, invited lectures, presentations of individual papers, and panel discussions on emerging issues. The accepted papers covered a broad range of themes related to the science and practice of earthquake geotechnical engineering and the advancement of performance-based design principles.

We are grateful to all the authors for their contributions to the proceedings, their responsiveness to reviewer comments, and their patience throughout the review processes. We believe your contributions will prove a valuable resource to practitioners, researchers, and students alike throughout our international community of geotechnical professionals.

The PBD-III Conference Steering Committee included:

Conference Co-chairs

Ross W. Boulanger, University of California at Davis
 Dharma Wijewickreme, University of British Columbia

Technical Program Committee

Ross W. Boulanger, University of California at Davis
 Jonathan D. Bray, University of California at Berkeley
 Atilla Ansal, Ozyegin University, Turkey
 I.M. Idriss, University of California at Davis
 Takaji Kokusho, formerly Chuo University, Japan
 Dharma Wijewickreme, University of British Columbia

Technical Proceedings Committee

Mahdi Taiebat, University of British Columbia
 Dharma Wijewickreme, University of British Columbia
 Adda Athanasopoulos-Zekkos, University of Michigan
 Ross W. Boulanger, University of California at Davis

Local Organizing Committee

Ali Amini, Naesgaard-Amini Geotechnical, North Vancouver
 W.D. Liam Finn, University of British Columbia
 Adrian Wightman, BGC Engineering, Vancouver
 Alex Sy, Klohn Crippen Berger, Vancouver

The abstract and paper review process was made possible by the dedicated contributions of numerous individuals:
