Slope stability evaluation by limit equilibrium and finite element methods - Aryal, K., Sandven, R., Nordal, S.

GIS aided slope instability analysis of the highway slope based on shear strength - Bhattarai, P., Tiwari, B., Marui, H., Aoyama, K.

Slope failure movements controlled by unloading - Cavounidis, S., Bardanis, M.

Shear strength behaviour of cohesive soils reinforced with vegetation - Cazzuffi, D., Crippa, E.

Trigger mechanism of progressive landslides analysis and explanation - Chirica, A.

Liquefaction flow slide at horizontal ground - De Groot, M.B., Korff, M., Pachen, H.M.A.

Evaluation of shear strength parameters for rain-induced slope instabilities - Farooq, K., Orense, R.P., Towhata, I.

Influence of degradation cycles on the mechanical characteristics of natural clays - Gullà, G., Mandaglio, M.C., Moraci, N.

Energy approach for earthquake induced slope failure evaluation - Ishizawa, T., Kokusho, T., Harada, T., Nemoto, S.

Energy analysis and model tests on lateral flow induced by water film effect in liquefied ground - Kabasawa, K., Kokusho, T.

Runout distance of gravitative debris flow - Law, K.T., Paudel, B.P.

Void redistribution research with 1-g and centrifuge modeling - Malvick, E.J., Kutter, B.L., Boulanger, R.W., Kabasawa, K., Kokusho, T.

An experimental study of the dynamics of subaqueous sediment gravity flows - Miyamoto, J., Sassa, S., Tokuyama, R., Sekiguchi, H.

Assessment of global landslide and risk hotspots - Nadim, F., Kjekstad, O., Peduzzi, P.

Real-time prediction of rainfall-induced instability in sandy slopes - Orense, R.P., Shimoda, S., Farooq, K.

Characterizing the modal responses of a composite soil nail under axial excitation - Salloum, T., Law, K.T., Pernica, G., Neels, L., Glazer, R.

Failure mechanism and characteristics of soil subjected to interaction between soil elements in simple shear - Shigemura, S., Tokue, T.

Combined approach for site investigation in terms of the analysis of rainfall induced landslides - Thiel, A., Friedel, S., Plotze, M., Springman, S.M.

Twenty-year monitoring of the Orvieto overconsolidated clayey slope (Italy) - Tommasi, P., Boldini, D., Ribacchi, R.

Estimating the geomechanical characteristics of a reactivated landslide - Tsatsanifos, C., Pandis, K.

Two examples of clay slope stability in areas affected by previous man-made activity - open pit mines, landfills - Vaniček, J., Záleský, J., Lamboj, L., Kurka, J.

Progressive failure of slope due to tunnel excavation and its numerical simulation - Yashima, A., Zhang, F., Ye, G.L.

Study on the interface shear strength of soil nails in a completely decomposed granite soil by laboratory pullout tests and large-size direct shear box tests - Yin, J.H., Chu, L.-M., Su, L.-J.
