Table of contents

Introduction  XIX

VOLUME 1

**Seventh James K. Mitchell Lecture and keynote papers**

The Seventh James K. Mitchell Lecture: Characterization of silt/sand soils  
*A-B. Huang*  
3

Evaluating effective stress parameters and undrained shear strengths of soft-firm clays from CPTu and DMT  
*P.W. Mayne*  
19

Characterizing mine tailings for geotechnical design  
*K. Been*  
41

New tools and directions in offshore site investigation  
*M.F. Randolph*  
57

Geotechnical site investigation in energetic nearshore zones: opportunities & challenges  
*N. Stark*  
69

Evaluating liquefaction and lateral spreading in interbedded sand, silt and clay deposits using the cone penetrometer  
81

The GP sampler: a new innovation in core sampling  
*K. Mori & K. Sakai*  
99

Simulation of the cone penetration test: discrete and continuum approaches  
*A. Gens, M. Arroyo, J. Butlanska, L. Monforte, J.M. Carbonell, M. Ciantia, & C. O’Sullivan*  
125

Geophysical properties of soils  
*J.C. Santamarina & J. Park*  
135

Session Reports

Geophysics, 1  
*S. Foti*  
147

Geophysics, 2  
*K. Suto*  
155

Case histories, 1  
*S. Buttling*  
159

Case histories, 2  
*M. Arroyo*  
167

General site characterisation  
*J. Wierzbicki*  
173

Pavements and fills  
*B. Look*  
181
Sampling and laboratory
J.A. Pineda 191

Rocks and residual soil characterisation
E.A.G. Marques 199

Interpretation and design of in situ tests
J.T. DeJong 205

Design using in-situ tests
A. Klar 211

Liquefaction assessment
A.V. da Fonseca, C. Ramos & M. Cubrinovski 217

Application of statistical techniques
M.B. Jaksa 233

Non-standard materials and tailings
P. Schnaid 239

Developments in technology and standards
F.A.B. Danziger & T. Lunne 245

Penetration testing
J. Puechen 251

Pressuremeter and dilatometer
S. Burlon, W. Frikha & P. Monaco 259

Theme 1. Developments in Technology & Standards

Integration of invasive and non-invasive techniques in ground characterisation
S.D. Ekanayake, C.J. Leo, D.S. Liyanapathirana & P. Harutoonian 273

In-situ determination of soil deformation modulus and the wave velocity parameters using the Panda 3®
E. Escobar, M.A. Benz Navarrete, R. Gourvès, P. Breul & B. Chevalier 279

Comparison of Unified and European soil classification systems

Televiewer imaging of boreholes; benefits and considerations for interpretation in the absence of physical rock core
G.T.C. McKenna & S.L. Roberts-Kelly 291

Additional parameters measured in a single CPT, click-on modules for the digital cone
M. Woollard, O. Storteboom, T. Länsivaara & J. Selänpää 297

Correction for CPT fs errors due to variation in sleeve diameter
M. Holtrigter & A. Thorp 303

Reduced pressuremeter test time procedure and new analysis method
K. Iskander 309

Earth pressure evaluation and safety assessment employing a novel measurement device – The Inclinodeformeter
G.M. Ausweger & F. Tschuchnigg 315
Theme 2. Penetration Testing

Correlation of p-wave velocity and SPT-N on volcanic soils in Costa Rica
S.J. Ibanez, S. Ortiz-Palacio, V. López-Ausin & J.A. Porres-Benito

Strength assessment of frozen soils by instrumented Dynamic Cone Penetrometer
S.Y. Kim, W-T. Hong, J-S. Lee & Y. Kim

The SPT N-value errors examined with digital technology
B. Look

SPT test: An approach to predicting undrained shear strength based on energy concepts
J.A. Lukiantchuki

Rotation speed analysis in SPT-T test by type of soil
R.R. Nuñez, T.T.C. Piovan & A.S.P. Peixoto

Critical appraisal of T-bar penetration tests
J. Peuchen & J. Terwindt

Free-falling full-flow penetrometer for marine material characterization – analytical solution
S. Pinkert

CPTu in consolidating soils
P.P. Rahardjo, B.W. Anggoro & A. Wirawan

Effect of rotation rate on shear vane results in a silty tailings
D. Reid

Analysis of instrumented sharp cone tests performed in a sensitive clay of Quebec
V. Silvestri & C. Tabib

Theme 3. Interpretation of In-Situ Testing

Relative densities and void ratios derived from CPT data using in situ field calibration
T. Biryaltseva, T. Mörz, S. Brandt, S. Kreiter, U. Gerdes & B. Ossig

Relative density prediction based on in-situ and laboratory measurements of shear wave velocity
T. Biryaltseva, T. Lunne, S. Kreiter & T. Mörz

Strain moduli of alluvial soils from CPT, DMT, Vs, and lab tests
G. Bosco & P. Monaco

Virtual T-bar penetrometer tests using Discrete Element Method
L.S. Carvalho, J.R.M.S. Oliveira, C.A.B. Vasconcellos, M.E.S. Marques, M.G. Teixeira & J.A. Lukiantchuki

Correlations between SPT and CPT data for a sedimentary tropical silty sand deposit in Brazil
Y.D. Costa, E.S. Cunha & C.L. Costa & A.C. Pereira

Finite element modeling of cone penetration test in weakly cemented sand
R. Debasis, S.D. Kumar, D. Arghya & G. Saswati

Cylindrical cavity expansion analysis applied to the interpretation of variable rate cone penetration in tailings
G. Dienstmann, F. Schnaid & S. Maghous

Reliability of soil porosity estimation from seismic wave velocities
S. Foti & F. Passeri

Laboratory measurement of sensitivity of carbonate soils
N. Boukpeti & B.M. Lehane

Maximum shear modulus of a Brazilian lateritic soil from in situ and laboratory tests

Engineering properties and cone factor of Osnøy clay, Louiseville clay and Mexico City clay

Influence of phosphate dispersing agents on particle size distribution of soil fines
A. Kaur & G.C. Fanourakis

The influence of in-situ effective stress on sample quality for intermediate soils
C.P. Krage, B.M. Albin, J.T. DeJong & D.J. DeGroot

Offshore prediction of sampler penetration and recovery using CPTs
N. Ramsey

Experience with gel-push sampling in New Zealand
M.E. Stringer, M. Cubrinovski & I. Haycock

Definition of failure in cyclic direct simple shear tests on normally consolidated kaolin clay and presentation of shear strain contour diagrams
D. Zografou, N. Boukpeti, S.M. Gourvenec & C.D. O’Loughlin

Theme 5. Liquefaction Assessments

Standard Penetration Test-based assessment of seismic soil liquefaction potential of Urmia, Iran
H. Bahadori & A. Hasheminezhad

Liquefaction assessment based on combined use of CPT and shear wave velocity measurement
Z. Bán, A. Mahler, T.J. Katona & E. Győri

The determination of factor of safety against liquefaction and post-liquefaction settlement
P.R. Klibbe

Soil classification and liquefaction evaluation using Screw Driving Sounding
S.Y. Mirjafari, R.P. Orense & N. Suemasa

Combined use of SDMT-CPTU results for site characterization and liquefaction analysis of canal levees
P. Monaco, L. Tonni, G. Gottardi, M. Marchi, L. Martelli, S. Amoroso & L. Simeoni

Estimating the cyclic softening of clays of five different sites at Matsyapuri, Willingdon Island, Kochin, Kerala, India

Field measurements of the variability in shear strain and pore pressure generation in Christchurch soils
J.N. Roberts, K.H. Stokoe, S. Hwang, B.R. Cox, Y. Wang, F.M. Men & S. van Ballegooy

Liquefaction assessment CPTu tests in a site in South of Portugal
C. Rodrigues, S. Amoroso, N. Cruz & A. Viana da Fonseca

Evaluation of DMT-based liquefaction triggering curves based on field case histories
K.M. Rollins, T.K. Remund & S. Amoroso

Liquefaction resistance of gravelly soil from Becker penetrometer (BPT) and Chinese dynamic cone penetrometer (DPT)
K.M. Rollins, T.L. Youd & M. Talbot
New developed soundings to assess liquefaction potential of soils
S. Sawada

Comparison of liquefaction evaluation based on SPT and geophysical tests (case study: Mahabad dam, Iran)
M.M. Shahrabi, F. Jafarzadeh, A.A. Garakani, N. Eskandari, M. Banikheir & H. F. Jahromi

Fines content correction factors for SPT N values – liquefaction resistance correlation
M.M. Shahien

A surface seismic approach to liquefaction
S. Castellaro & R. Panzeri

Theme 6. Pavements and Fills

Evaluation of rockfill embankments by field tests in Siraf Refinery Complex site, Iran
E. Asghari-Kaljahi, N. Nasrollahi & Z. Kheyroui

Control of soil compaction in pavement layers: a new approach using the dynamic cone penetrometer (DCP)
A. Belincanta, J.A. Lukiantchuki & J.H.C. Reis

A new indirect tensile testing setup to determine stiffness properties of lightly stabilised granular materials
D.K. Paul, R. Gnanendran & M.J.I. Alam

New and innovative approach to ensuring quality of quarry source materials in Queensland road infrastructure construction
A. Dissanayake & P. Evans

Correlation between the results of the PLT and CBR tests to determine the elasticity modulus
A. Hajiannia, M.T. Dorobati, S. Kasaeian & S.B. Baghbadorani

Characterization of railroad track substructures using dynamic and static cone penetrometer
W-T. Hong, S. Kang, J-S. Lee, Y-H. Byun & C-Y. Choi

Suggested QC criteria for deep compaction using the CPT
P.K. Robertson

Proposed performance criteria for earthwork construction quality control
A. Sawangsuriya, S. Wachiraporn, S. Sirisak & W. Lawanwisut

Collapse settlement and strength characteristics of unsaturated soils with different degrees of compaction
A.M. Shahnoory & M. Sugiyama

Geotechnical characterization of a heterogeneous unsuitable stockpile
K. Rengifo, F. Herrera & L. de la Cruz

Verification of an impact rolling compaction trial using various in situ testing methods
B.T. Scott, M.B. Jaksa & E. Syamsuddin

Theme 7. Pressuremeter and Dilatometer

Pressuremeter tests in the hard soils and soft rocks of Arak Aluminum Plant site, Iran
E. Asghari-Kaljahi, Z. Khalili & S. Yasrobi
Stress-strain response of fine silica sand using a miniature pressuremeter
A.A. Bagbag, J.P. Doherty & B.M. Lehane

Use of flat dilatometer in Ontario
L.F. Cao, S.M. Peaker & S. Ahmad

Self-boring pressuremeter tests at the National Field Testing Facility, Ballina NSW
F.M. Gaone, J.P. Doherty & S.M. Gourvenec

Practice of the PENCEL pressuremeter in foundations design
F. Messaoud & P.J. Cosentino

In situ characteristics of Manhattan glacial deposits from pressuremeter tests
C.E. Ho

Membrane correction for pressuremeter test
J. Monnet, D. Mahmutovic & L. Boutonnier

New DMT method for evaluating soil unit weight in soft to firm clays
Z. Ouyang & P.W. Mayne

Evolution of deformation parameters during cyclic expansion tests at several experimental test sites
P. Reiffsteck, S. Fanelli & G. Desanneaux

Ground property characterization from in-situ tests: opportunities offered by measuring thrust during Flat Plate Dilatometer testing
J.H. Schmertmann & D.K. Crapps

Interpretation of the instrumented DMT (iDMT)- a more accurate estimation of $p_0$
H. Shen, W. Haegeman & H. Peiffer

Determination of $E_m$ from Ménard pressuremeter tests for gneiss residual soils
T.Q. Silva, E.S. Cândido, E.A.G. Marques & E. Minette

Author index

VOLUME 2

Theme 8. Geophysics

Multi-dimensional Electrical Resistivity Tomography (ERT) for the mapping of the zones with (or without) cavities in Hofuf KSA
S.N. Abduljauwad, H.R. Ahmed, M.A. Shafiq & M. Abdul-Waheed

Preliminary results of P-wave and S-wave measurements by seismic dilatometer test (SPDMT) in Mirandola (Italy)
S. Amoroso, C. Comina, S. Foti & D. Marchetti

Geophysical characterisation of marine and quick clay sites: field and laboratory tests
S. Bazin, H. Anschütz, G. Sauvin, T.E. Helle, S. Gribben, S. Donohue & M. Long

Near-surface geophysical scanning for exemplar landslide projects in Poland
Z. Bednarczyk

Imagery of nonlinear soil behaviour using in-situ and laboratory tests

An investigation into the effects of material properties on shear wave velocity in rocks/soils
N. Campbell, C. Fenton & S. Tallett-Williams
Integrated use of terrestrial laser scanning and thermal imagery for characterization of hydrothermally altered granites

J.S. Coggan, D.M. Pascoe, M.L. Eyre & J.H. Howe

Soil discrimination using an electrical logging method

M. Fujii, K. Watanabe, T. Fukaya & K. Takechi

Inversion of effective phase velocity seismic surface wave data by partial least squares regression

G. Heymann, D.N. Wilke & S. Kok

Use of GPR on two sites with voids to enable safer work and targeted probing

C.G.C. Hughes, K.J. Read & M. Watson

Assessment of underground karst caves using geophysical tests: a case study for Lajamgir dam site, Iran

F. Jafarzadeh, M.M. Shahrabi, M. Banikheir, N. Eskandari, A.A. Garakani & H. F. Jahromi

A comparison of in-situ and laboratory resistivity measurements in soft clay

R.B. Kelly, J.A. Pineda & L. Siwal

Geophysical characterisation for dredging of the Marine Industry Park, Darwin

J. Lean & S. Williams

Generalization and standardization of multi-station surface wave method for site investigation

C.P. Lin & C.H. Lin

Characterisation of small strain rock modulus from ultrasonic pulse velocity testing

B. Look, S. Schneider & C. Gallage

Use of geophysical logs to map aquifers electrofacies

R. Macari, A.S.P. Peixoto & G.G. Nery

Multichannel Analysis of Surface Waves (MASW) for offshore geotechnical investigations

T. McGrath, M. Long, P. O’Connor, A. Trafford & D. Ward

In-situ detection of sensitive clays from a geophysical perspective

Regional geotechnical railway corridor mapping using airborne electromagnetics

Fractures location on karstified limestone surfaces by electrical resistivity tomography characterization

J.A. Porres-Benito, S.J. Ibanez, S. Ortiz-Palacio & V. López-Ausín

Site characterization of seismic stations based on downhole tests to 30 m depth in South Korea

C.G. Sun, J.M. Jeong, K.S. Kim & I.S. Jang

Design and application of a low-cost, 3D printed crosshole seismic system - Preliminary assessment

M.B. Sylvain, M.A. Pando, M.J. Whelan, V.O. Ogunro & Y. Park

S-wave borehole tomography for geotechnical site characterization

J.K. von Ketelhodt, T. Fechner & M.P.E. de Kleine

Analysis of active MASW test data for a convergent shear wave velocity profile

S.S. Kashyap, A.M. Krishna & A. Dey

Development of an unmanned aircraft mounted software defined ground penetrating radar

J.F. Fitter, A.B. McCallum & J. X. Leon

Simplified seismic soil classification: the velocity-frequency-impedance (VfZ) matrix

S. Castellaro
The complementarity of HV and dispersion curves
S. Castellaro

Theme 9. General Site Characterisation

Characterisation of Halden silt
Ø. Blaker, R. Carroll, J.-S. L'Heureux & M. Klug

In situ behavior of clay soils over different drought-rewetting conditions
A. Denis, R. Fabre & J.F. Lataste

Geotechnical site investigations for dredging works - Port of Townsville
M. Jaditager & N. Sivakugan

Using multi-channel analysis of surface waves and cone penetrometer tests to delineate an in-filled palaeochannel during routine investigations - A Christchurch earthquake case study
R. Kamuhangire, T. Plunket & C. Rüegg

CPTU crossing existing boreholes in the soil
K. Kåsin

Effect of inter-particle strength on $K_0$ correlation for granular materials
J. Lee, G. Kim, I. Kim, D. Kim, & B. Byun

Soil behaviour type of the Sarapuí II test site
P.F. Nejaim, G.M.F. Jannuzzi & F.A.B. Danziger

Geophysical and in situ testing applied to site characterisation for non-engineered structures in developing regions
S. Ortiz-Palacio, S. Ibáñez García, V. López-Ausín & J.A. Porres-Benito

Geotechnical characterization of Ballina clay
J.A. Pineda, R.B. Kelly, L. Suwal, L. Bates & S.W. Sloan

Geotechnical parameters of soft soil in Macaé – Rio de Janeiro
L.M.M. Povoa, P.N.C. Nascimento, P.C.A. Maia & V.S. Singui

Geophysical and geotechnical characterisation of the Saltwater Creek bridge site, Morten Bay rail project, Queensland, Australia
A. Purwodihardjo, T. Rahiman, M. Parsons & J. Kruger

CPT, DMT and MASW allowing economic design of a large residential project over soft soils
N.B. Schofield & R.W. Burke

A 2016 case for public geotechnical databases
T. Thompson

Site characterization and seismic response analysis in the area of Collemaggio, L'Aquila (Italy)
G. Totani, P. Monaco, F. Totani, G. Lanzo, A. Pagliaroli, S. Amoroso & D. Marchetti

Geotechnical and geophysical site characterization of a nuclear power plant site in United Arab Emirates
S. Parashar, R. Rice, P. Asprouda, H. Al Hammadi & J.D. Lee

Theme 10. Characterisation in Rock and Residual Soil

Continuous-interval seismic piezocene testing in Piedmont residuum
S.S. Agaiby, E. Cargill, T. Ku & P.W. Mayne
Assessment of results of CPT tests in porous lateritic unsaturated soil from Campinas, Brazil
P.J.R. Albuquerque & T.G. Rodriguez

Piezocone tests in residual soils: a Portuguese experience in granitic soils
N. Cruz, J. Cruz, F. Martins, C. Rodrigues & M. Cruz

A method to assess rock strength and excavatability of diamondiferous kimberlite ore through in situ rock testing
S. Elbaz, D. Crawford & M. Tuck

Evaluation of the vulnerability of rock weathering based on monitoring using photogrammetry
D.H. Kim, I. Gratchev, E. Oh & A.S. Balasubramaniam

In-situ rock stress determined by hydraulic fracturing test in Singapore
K. Kimura, T. Yasuda, S. L. Chiam & K. H. Goay

Use of the Light Falling Weight Deflectometer (LFWD) as a site investigation tool for residual soils and weak rock
D. Lacey, B. Look & D. Marks

Morphology and geotechnical characterization of a phyllite weathering profile developed under tropical climate
M.F. Leão & E.A.G. Marques

Evaluation of the engineering properties of the weathered layer in Korea
S.H. Lee, B.H. Jo & C. Chung

Impact of rock mass strength parameters on low wall stability assessment outcomes in open-cut coal mines
J. Li, N. Tucker & J.K. Todd

Investigation the results of Plate Load Test using rigid plates in weak rock masses: a case study
M.G. Nik, B. Abrah & E.G. Samani

Characterization of unsaturated tropical soil site by in situ tests
B.P. Rocha, R.A. dos Santos, R.C. Bezerra, R.A. Rodrigues & H.L. Giacheti

G-γ decay curves in granitic residual soils by seismic dilatometer
C. Rodrigues, S. Amoroso, N. Cruz & J. Cruz

A consideration on the shear strength characteristics of unsaturated volcanic soils
A.S. Samim & M. Sugiyama

Characterisation of a lateritic soil using laboratory and in-situ tests
W. Shi, B.M. Lehane, A. Gower & S. Terzaghi

Theme 11. Characterisation of Non-standard soils

Estimation of undrained shear strength for peat using CPT
H. Hayashi & T. Hayashi

A review of the unconfined compressive strength of microbial induced calcite precipitation treated soils
R.N. Hora, M.M. Rahman, S. Beecham & R. Karim

Challenges with sampling coarse-grained permafrost: an experience in Svalbard
T.M.H. Le, M. Wold & M.G. Bærverfjord

Collapse settlement and strength characteristics of unsaturated soils with different degrees of compaction
A.M. Shahnoory & M. Sugiyama
Prediction of swelling potential of Sudanese clayey sand (SC) soils
H. Shammat & M.A. Osman

**Theme 12. Design Using In-situ tests**

Evaluation of tip resistance to auger drilling
*G.G. Boldyrev & G.A. Novichkov*

Characterisation of a Norwegian quick clay using a piezoball penetrometer
*N. Boylan, A. Bihs, M. Long, M.F. Randolph & S. Nordal*

Observing friction fatigue on calcareous material
*D. Denes*

Data driven design - a vision for an automated approach
*J.P. Doherty & B.M. Lehane*

The Smithfield Bypass project – Justifiable need for a second stage piezocone testing
*L.E. Ezeajugh*

Soil strength in the Murray River determined from a free falling penetrometer
*A. Fawaz, A. Teoh, D.W. Airey & T. Hubble*

Correlations of regional (Poland) geotechnical parameters on the basis of CPTU and DMT tests
*T. Godlewski*

Evaluating the OCR and permeability of cutoff wall using CPTU results
*X.P. Li, G.J. Cai, J. Lin, S.Y. Liu & A.J. Puppala*

Evaluation of relative density and liquefaction potential with CPT in reclaimed calcareous sand
*P. Mengé, K. Vinck, M. Van den Broeck, P.O. Van Impe & W.F. Van Impe*

Use of CPTU for the assessment of the stiffness model of subsoil
*Z. Młynarek, J. Wierzbicki & W. Wolyński*

Empirical estimation of soil unit weight and undrained shear strength from shear wave velocity measurements
*S.W. Moon & T. Ku*

Small strain stiffness assessments from in situ tests – revisited
*J.J.M. Powell, L. Dhimitri, D. Ward & A.P. Butcher*

Case studies on variability in soils and driven pile performance
*W.A. Prakoso*

Evaluation of CPT- based ultimate lateral pile resistance in sand
*H.Y. Qin & W.D. Guo*

Interpretation of CPT data for pile loading behavior - inverse estimation of void ratio over depth
*K.-F. Seitz, E. Heins, A. Carstensen & J. Grabe*

Interpretation of shear strength data for construction on mine tailings deposits
*D.J. Williams*

Estimation of shear wave velocity based on SPT profile data
*F. Yi & F.P. Yi*

Application of dynamic cone penetrometer for measuring active thaw layer depth
*H-K. Yoon, Y.S. Kim, S.S. Hong, Y-H. Byun & J-S. Lee*
Theme 13. Case Histories

Two-dimensional non-linear dynamic response of a heap leach pad located in Peru
F.C. Perez & J.D. Ale

Ultimate resistance and settlement of foundations using Ménard pressuremeter test results: case of bored piles
R. Bahar, N. Alimrina & L. Djerbal

Applicability of CPT to determine geotechnical properties of sand deposits to an Uruguayan gas plant
A.W.R. Barreto & B.L.C.G. Árabe

Study on seismic response analysis in “Vincenzo Bellini” Garden area by Seismic Dilatometer Marchetti tests
A. Cavallaro, S. Grasso & A. Ferraro

Predicted and measured behaviour of a tall building in a lateritic clay
L. Décourt, C. Grotta Jr., A.S.D. Penna & G.C. Campos

Remedial measures to facilitate the construction of stable bridge approach fills: a case study
V. Diyaljee

Subsidence characterisation for a proposed concrete shaft using a 250m deep inclinometer borehole - Huntly East Coalmine, New Zealand
Z. Du, M. Barks, V. Moon, P. Page, R. Winter & L. Cunningham

Subsurface compacted rubble raft technology for ground improvement
Z. Du & M.A. Shahin

A4 motorway operation in the area of linear discontinuous surface deformations
M. Grygierek & J. Kawalec

Effects of additional excavation on critical slip surface of stabilized walls with soil nailing
A. Hajiannia, M.T. Dorobati, S.B. Baghbadorani & S. Kasaeian

Field investigation of the performance of soft soil reinforcement with inclined pile
A.T. Harianto, L. Samang, B. Suheriyaina & Y. Sandyutama

Static load testing of concrete free reticulated micropiles system
A. Mehdizadeh, M.M. Disfani, R. Evans, E. Gad, A. Escobar & W. Jennings

A comparative analysis of the stability of a slope in an overconsolidated clay pit based on CPT and DMT measurements
H. Peiffer

How many drillings are necessary? A case study
M. Premstaller

Elastic and non-elastic response of pile-raft system embedded in soft clay
M.V. Shah, A.R. Gandhi & D.V. Jakhodiya

Geotechnical monitoring of in situ heater test
K. Sosna & J. Záruba

Site investigation, monitoring and stability analysis of a built-up slope involved by gas pipeline explosion
G. Totani, F. Totani, P. Monaco & L. Simeoni

A preliminary design of ground improvement by grouted stone columns for a shopping centre
A.M. Ünver & I.S. Ünver
Comparison of pile design following two standards: EC7 and AS2159
S. Buttling

Different response of apparently identical structures: a far-field lesson from the Mirandola (Italy) 2012 earthquake
S. Castellaro

In-situ performance assessment of ballasted railway track stabilised using geosynthetics and shock mats
S. Nimbalkar & B. Indraratna

Measuring and comparing soil parameters for a large bridge on East coast of United States
R. Failmezger, G. Sedran & D. Marchetti

Behavior of a model shallow foundation on reinforced sandy sloped fill under cyclic loading
M.J.I. Alam, C.T. Gnanendran & S.R. Lo

Theme 14. Application of Statistical Techniques

Frequency spectrum “Bell-curve” fitting as a component of SCPT interval velocity accuracy assessment
E. Baziw & G. Verbeek

Enhanced data interpretation: combining in-situ test data by Bayesian updating
J. Huang, R.B. Kelly & S.W. Sloan

Calibration of Vs prediction model based on SPT-N using conditional probability theory
T. Kishida & C-C. Tsai

Identification of geologic depositional variations using CPT-based conditional probability mapping
C.P. Krage, J.T. DeJong & R.W. Boulanger

Probabilistic assessment of laterally loaded pile performance in sand
B.M. Lehane, F. Glisic & J.P. Doherty

Stochastic waveform inversion for probabilistic geotechnical site characterization
S.S. Parida, K. Sett & P. Singla

Automatic methodology to predict grain size class from dynamic penetration test using neural networks
C. Sastre, M. Benz, R. Gourvès, P. Breul & C. Bacconnet

Quantifying and reducing uncertainty in down-hole shear wave velocities using signal stacking
M.A. Styler & I. Weemees

3D mapping of organic layers by means of CPTU and statistical data analysis
J. Wierzbicki, A. Śmaga, K. Stefaniak & W. Wołyński

Assessment of ground improvement on silt based on spatial variability analysis of CPTU data

Theme 15. Environmental Testing

Observed influence of ambient temperature variations on the analysis of ground thermal response tests
S. Colls
Monitoring the plume of potassium chloride from wells used as ground improvement in highly sensitive clays
T.E. Helle, P. Aagaard, A. Emdal & S. Nordal 1501

The effects of preload surcharge on arsenic and aluminium mobilization in pyritic sediment

Electrical conductivity breakthrough curve of soil column with residual diesel fuel
M. Oh & Y.S. Kim 1513

Experimental study on water content and density effects on dielectric permittivity of selected Victorian soils
A. Orangi, D.S. Langley, N.M. Withers & G.A. Narsilio 1517

In-situ soil water content estimation using new capacitive based sensors
A. Orangi, N.M. Withers, D.S. Langley & G.A. Narsilio 1523

Site characterization for a new refinery in a disposal area for bituminous residue

Influence of periodic hydrocarbon contaminated bentonite on strength and settlement characteristics of stone column
M.V. Shah & H.C. Chokhawala 1535

A preliminary study on evaluating the performance of aged landfill covers using DC and CC resistivity methods
Y.X. Wu, Y.H. Wang & X. Zhang 1541

Assessment of the infiltration capacity of a retention pond by the TDR measurements
I.A. Ichola & C. Anzoras 1547

Author index 1553
