This paper was downloaded from the Online Library of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE). The library is available here:

https://www.issmge.org/publications/online-library

This is an open-access database that archives thousands of papers published under the Auspices of the ISSMGE and maintained by the Innovation and Development Committee of ISSMGE.
Proceedings of the 13th Australia New Zealand Conference on Geomechanics
Perth, Western Australia, 1-3 April, 2019

Hugo E. Acosta-Martínez & Barry M. Lehane
Editors
13th AUSTRALIA NEW ZEALAND CONFERENCE ON GEOMECHANICS
13th Australia New Zealand Conference on Geomechanics

Editors
Hugo E. Acosta-Martínez
Aurecon, Australia

Barry M. Lehane
Department of Civil, Environmental & Mining Engineering, The University of Western Australia, Australia
# Table of contents

**Introduction**

**Keynote papers**

- Geosynthetic-reinforced soil structures for transportation – from walls to bridges -  
  *F. Tatsuoka*  
  p. 3

- The NZGS Geomechanics Award Lecture (2018)  
  Some important considerations in the engineering assessment of soil liquefaction  
  *M. Cubrinovski*  
  p. 19

- The AGS Practitioner Award Lecture (2016)  
  Trying to make a difference – and why sometimes we can’t  
  *R.A. Day*  
  p. 37

- Dealing with the challenges of underground construction  
  *O. Sigl*  
  p. 43

- Utility of critical state soil mechanics  
  *M.G. Jefferies*  
  p. 51

- Effective communication to manage geotechnical risk  
  *M.A. Woodward*  
  p. 57

- Unexpected ground movements and their impact  
  *D.P. Stewart*  
  p. 63

**Theme 1. Site Investigation**

- Digital geological field data capture and analysis tool  
  *C. Gibbons, O. Hoel, L. Glasson, S. Yorke & C. Mangos*  
  p. 77

- Assessing expansive soil risk using remote sensing  
  *R.C. Roberts, L. Ge, Z. Du & N. Khalili*  
  p. 83

- The use of ground penetrating radar to identify karst terrain features in the Northern Territory  
  *B.I. Thomas & D.P. King*  
  p. 89

- The legacy of geotechnical information from the Brisbane Airport Link and Northern Busway project  
  *T. Thompson*  
  p. 95

- Geotechnical investigation and design of aerodrome pavements in saline and expansive subgrade conditions in South Australia  
  *S. Ellis & S. Chakrabarti*  
  p. 101

- Development of a safety dynamic cone penetrometer  
  *S.J. Clarke*  
  p. 107

- Calibration of the helical probe test  
  *R. Kelly, B. Morris, K. Kianfar, A. Uhrig, R. Beeston & L. Bates*  
  p. 111

- Influence of distance-weighted averaging of site investigation samples on foundation performance  
  *M.P. Crisp, M.B. Jaksa & Y.L Kuo*  
  p. 117

</tbody>
</table>
Temperature response in permafrost at Dasan Station, Arctic
S.S. Hong & Y.S. Kim

Design and application of a high-performance true triaxial stress cell
A. Rezagholilou, S. Fallahzadeh, N. Nourifard, S. Tehrani, N. Tarom & M. Sarmadivaleh

Theme 3. Foundations
Settlement of a multi-storey carpark structure on Perth sand
D.P. Stewart
Cyclic capacity of dynamically installed anchors and plate anchors in clay
Design, driveability, driving and dynamic testing of large diameter close ended steel tube piles for a pedestrian bridge
S.K. Tan & G.A. Chapman
Predicting in-ground buckling instability of the steel H-beam pile through nonlinear analysis
C. Lee, C. Ng & R. Kelly
Pile analysis and design for Optus Stadium
K. L. Cook, M. Hodder & S. McGinn
Foundation design lessons from petroleum industry to offshore wind turbine
A. Rezagholilou, B. Jayakumar & A.B. Rodriguez
The design evolution of replacement motorway bridge approach embankments
N. Campbell & C. Bridges
Investigation and testing of short tension piles installed in Calcrete
J. Surjadinata, A.B. Nguyen, T. Whiting & J. His
Key elements for the reliable assessment of driven pile capacity
B.G. Look, A. Kemp & J. Seidel
Design and construction challenges of cast-in-place piles in weak rock for a bridge structure at the Gateway Upgrade North Project
O. Craciun, C.A. Bridges, R.J. Martin & J. Boyle
Adding new levels to old buildings: A case study in foundation assessment
S. Colls
A review on pile setup and relaxation in layered soils in various Highway projects in New South Wales
T.A. Peiris, K.F. Chan & F. Siahaan
Effects of basement resistance on tall building foundation behaviour
H.S.W. Chow & H.G. Poulos
Application of Fibre Bragg Grating sensor in mini pile performance and behaviour monitoring
C.F. Tsang, A. Mehdizadeh, G. Narsilio & M. Disfani
Numerical modelling of ram-compacted bearing base piles
Z. Du, M. Walske, M.A. Shahin & B. Ghadimi
Shaft capacity of non-displacement piles in silts and clays
L.V. Doan & B.M. Lehane
Plugging, set-up effects and load capacity of open-ended pipe piles
S.T. Srithar
A discussion on piling supervision for rock socket design verification
K.M. Farry
Lateral pile analysis based on subgrade reaction and comparison with other methods
Y. Gong & D. Wang

Geotechnical investigation and design of Cape Lambert dolphin piles
Y.K. Liew, J. Fong, S. Begg, D.P. King & A. Slade

Foundation design and performance of 8,300 tonne storage tanks in Kwinana, WA
J.K. Lim, L. McDonald & M. Woodward

Base grouting of bored piles on the Hamilton Section of the Waikato Expressway Project
G. Alexander, H. Wick & T. Pervan

Transmission Gully Bridge 20 temporary works
S.J. Clarke, T. Rutherford, M. Salcher, M. Habte & C. McColgan

Back analysis of an instrumented CFA pile in Perth sand
D.P. Mills & C.S Butterworth

Base cleanliness of bored piles revisited – a case study
W.L. Chong, X. Le & S. Rex

Foundation re-use and evaluation of geotechnical parameters for foundations in Sydney Sandstone
P.A. O’Brien & D.W. Airey

Uplift capacities of vertical double-plate anchors in sand
V.B. Tilak & N.K. Samadhiya

Foundation underpinning for the upgrade of aged culvert under the carriageway of a heavily-trafficked road
F.R. Siahaan, T. Muttuvel & A. Hubaut

Pile design using CPT results: the “LPC method”
F.A. Verheyde & F. Baguelin

Lateral soil displacement resulting from the installation of CFA piles in soft marine clays
J. Fetherston, R. Flynn & W. Chong

Theme 4. Retaining Structures
The effect of the in-situ stress field on basement performance – a case study from Sydney, Australia
A.L.E. Lochaden, C.M. Haberfield & B. Francis

Design charts for lateral deflection of embedded cantilever walls in unsaturated Perth sands
B.M. Lehane, A. Bagbag, C. Durham & T. Pine

Retaining wall design in expansive clay for the Darlington Upgrade Project
S.T. Wong & S. Cowan

Assessment of strut load redistribution due to removal of individual strut of an excavation support
V. Tandjiria & K.C. Chew

An innovative approach to modelling braced retention systems in Plaxis
M.A. Khan, S. Maqbool & L. Lu

Lateral load - Deflection profile of cantilever sheet pile wall
Aparna & N. K. Samadhiya

Investigation of corner effects of deep excavations using the combination of soil nailing and ground-anchors methods
A.A. Zad & M. Mohammadi Hejr
Back analysis of an instrumented cantilever diaphragm retaining wall in layered soils
C.S. Butterworth & H.S. Phadnis
What you design is what you get – An economical way to the stability design of propped cantilever walls
C.K.S. Yuen

Theme 5. Slopes
Massive landsliding in Narrabeen sandstones in the Watagan region
S.G. Fityus, P. Flentje & R. Rigby
Judgements of landslide frequency and their effects on risk assessment in the coastal dune systems of south east Queensland
I.C.F. Shipway & D. Cooper
Implications of groundwater pressure models for slope stability assessment
J.V. Simmons
Slope failure risks by engineering geological logic and the simplified step path method
N. Bar & N.R.P. Baczynski
Understanding the mechanisms of a large slow-moving landslide in the Manawatū gorge, New Zealand
A. Punt, P. Robins, P. Wopereis & R.I’Anson
Structural solution for the stabilisation of a major highway slope – a case study from regional New South Wales
S. Aryal & H. Zhang
Probabilistic approach for berth slope instability risk assessment: case study for Port of Brisbane quay line
J. Alinur, A. Purwodihardjo & N. Honeyfield

Theme 6. Soft Soil Engineering
Preloading of deep soft foundation for an Administration Building of Container Terminal at Melbourne
K. Chen & G. Hunter
Performance of embankment on soft soil facilitated with Prefabricated Vertical Drains (PVDs) under surcharge preloading at National Field Testing Facility (NFTF)
P. Baral, B. Indraratna & C. Rujikiatkamjorn
Comparison of surcharge and vacuum pressure effects on radial consolidation
K. Kianfar, B. Indraratna & C. Rujikiatkamjorn
Lessons learned from the geotechnical design and construction of a temporary bridge on soft ground
H. Zhang
Sportsmans Creek Bridge - Approach embankment design and construction over 30 m thick alluvial flood plain
V. Nguyen, P. Wong & G. Rayward
Design techniques drawn from the prediction of embankment behaviour on PVD improved Ballina clay
B. Poon, K.F. Chan & D. Perera
Surcharge design using a probabilistic framework
K. Biram
Case studies of an innovative ground improvement method - High vacuum densification method
R. Zhong & F. Haryono

The Hunter Expressway Buchanan soft soil problem – what to do when settlement exceeds expectations
R. Kingsland, H. Zhang, V. Urbano, C. McCallum & A. McCann

2D numerical modelling of sand compaction pile in soft soil under railway embankment
M. J. Alam & M. Islam

Consolidation and creep settlement of Ballina soft soils
H.D. Subasinghe, M.A. Khan & M.P. Dineshharan

Bund stability analysis at Lyttleton Port, NZ expansion project
A. Hutchinson, C. Thompson & C. Dai

Instability of fill embankments on soft marine sediments during construction and remediation
B. Aery, J. Davis & A. Kemp

Estimation of creep settlement reduction due to surcharging using commercially available software
V. Tandjiria & D. Andrew

Theme 7. Offshore and Marine Geotechnics

Design and installation of mobile offshore drilling unit mooring piles using innovative drive-drill-drive techniques
I. Finnie, R. Gillinder, M. Richardson, C. Erbrich, M. Wilson, F. Chow, M. Banimahd & S. Tyler

The Maari WHP foundation – Design, installation and performance
P.G. Watson, G. Jackson & C. Humpheson

Suction bucket foundations for offshore renewable energy installations
B. Bienen, R. Ragni, N. Fiumana & C. Gaudin

Remediating contaminated marine sediments using a mudcrete reclamation
W.D. Thorburn & G.B. Farquhar

SH1 Realignment – Optimisations and innovations on new MSEW Seawalls
I. Antonopoulos, C. McDermott & S. Karmacharya

An assessment of the traditional geotechnical design method for cyclic loading of shallow foundations
D. Zografou, S. Gourvenec, C.D. O’Loughlin & M. Banimahd

Performance of coastal structures: A case history comparison between MSEW (seawall) and RSS (embankment), Canterbury, New Zealand
S. Sadeghifard & I. Antonopoulos

Full scale field trials of a MSEW - Mass concrete block facing seawall connection system
C. McDermott, I. Antonopoulos & H. MacMurray

Mooring of wave energy system using dynamically installed anchors

Estimating the drained friction capacity of pipelines on mobile seabeds
J.G. Tom, T.J. Griffiths, D.J. White & S.H.F. Leckie

Theme 8. Ground Improvement

Design of a reinforced soil capping beam over a soil-bentonite barrier wall
S.J. Goodall

Effects of asperities on the geotextile-geomembrane interface shear characteristics
D.D. Adeleke, D. Kalumba & P. Hardie

Microscopic investigation of interparticle-interaction between sand particles and biopolymer
S. Lee & I. Chang

Working platforms for tracked plant – BR 470 guideline and a revised approach to stabilisation design with multiaxial hexagonal geogrids
M.J.D. Dobie, A.S. Lees, J. Buckley & R. Bhavsar

Geotechnical treatment of a brownfield site with compressible soils for a residential redevelopment in Port Adelaide, South Australia, using a performance-based design and observational approach
M. Lee & V. Blanchet

Polymer addition to enhance healing and self-healing of kaolin clay
S.Z. Chen, Y.X. Gan & D.W. Airey

Ground improvement of an old quarry (landfill) using dynamic compaction methods
J. Zeerak, A. Garrard & A. Abou Antoun

Geotechnical aspects and monitoring of ground treatment for Nundah Creek bridge approach embankments
M. Phillipson, J. Alinur & N. Manche

Wide range of application of ground reinforcement by means of rigid inclusions in foundation works
M. Krzeminski & E. Lin

Ground modifications using mass soil mixing technique in geotechnical engineering
M. Krzeminski & M. Lai

Utilising novel green binders in ground improvement applications
M. Yaghoubi, A. Arulrajah, M.M. Disfani, S. Horpibulsuk, S. Darmawan & M.W. Bo

Bridging sinkholes using geosynthetic reinforcement
N. Sasiharan, R.S. Merifield & A. Middleton

Optus Stadium enabling works ground improvement
B. Hamidi

Optimisation of bridge approach embankments and retaining wall foundations design using wet soil mixing ground treatment
A.H.M. Kamruzzaman, B.R. Thomas, L. Tram & K.F. Chan

Artificial ground freezing application for tunnelling works in Hong Kong

Stabilization/solidification of incineration fly ash (IFA) in cement-stabilized clay
W. Li, Y.J. Ong & Y. Yi

Advancements in track technology: Use of artificial inclusions for stabilising transport infrastructure
B. Indraratna, T.N. Ngo & F. Ferreira

Influence of soil clogging on the performance of jute fibre drains installed in Ballina clay
T. T. Nguyen, B. Indraratna & J.P. Carter

Measurement of subsurface vibrations during sinkhole remediation by vibrocompaction, Alkimos, Perth, WA
A. Websper, D. Wade, M. Lai & S. Masterson

Building on soft ground: a case study in Tauranga, New Zealand
D. Sandilands & B. O'Loughlin
Comparing the relative merits of dynamic compaction, rapid impact compaction and impact rolling  
D. Avalle, B. Scott & A. Bouazza

**Theme 9. Rock Mechanics**

Experimental analysis of rock stiffness degradation due to the cyclic loading  
M. Ghamgosar

Mechanical characterisation of a highly friable weak sandstone  
M. Khoshini, A. Khoshghalb, H. Moghaddasi & N. Khalili

Experimental study on influence of impact angle on fragmentation of brittle blocks upon dynamic impact  
D.E. Guccione, S. Fityus, N. Gregg, A. Giacomini & O. Buzzi

Effect of cryogenic thermal exposure on geomechanical rock properties  
M.Z. Rasheed, S. Khan & N. Tarom

Ground response due to temporary pillar removal in motorway caverns in Sydney sandstone  
M. Salcher, T. Nash, A. de Ambrosis & C. Grabham

A study of the sensitivity of rolling behaviour to block shape  
M. Mousakhani, S. Fityus, R. Ruaiia & A. Giacomini

Torlesse rock mass classification system and structural regimes for rock engineering – Wellington, New Zealand  
R. Cammack, T. Rutherford, M. J. Eggers & B. Rouvray

Deterioration of sandstones and shales in Sydney tunnels  
T. Nash, R. Bertuzzi & A. de Ambrosis

Acoustic approach to determine Biot effective stress coefficient of sandstone using true triaxial cell (TTSC)  
H. Salemi, N. Nourifard, S. Iglauer, A. Rezagholilou & M. Sarmadivaleh

Coupled discrete element and finite difference modelling of wave propagation across rock mass considering multiple reflections between ground surface and joint  
B. Huang & B. Fatahi & S. Zargarbashi

**Theme 10. Mining Geotechnics**

Geotechnical management of large scale slope deformations at the Teal Gold Project, WA  
J.W. Watton & M.J. Fowler

Operational and construction impacts on GCL performance in TSFs  
E.J. Boczek & M. Amtsberg

Investigation of shallow mine workings for the proposed Newcastle Light Rail Project  
D.L. Knott, A. Hitchon & R.I. Kingsland

Improving workability of cement paste backfill using new binders  
A. Taheri, Y. Zhao, A. Soltani, M. Karakus & A. Deng

Engineering geological modelling of the Archean – Cenozoic unconformity in the Pilbara and implications to open pit slope design  
D.J. Hemraj

Instrumented column testing of settling, consolidation and desiccation of coal tailings slurry under ambient weather conditions  
C. Zhang, X. Lei, S. Quintero, D.J. Williams & S. Jensen

Some geotechnical lessons learned on foundation construction of Sydney’s tallest building, Crown Sydney Hotel Resort  
B. Azari, S. Mirlatifi, H. Buys & I. Cullen  

Geotechnical interfaces on Optus Stadium  
K.L. Cook, S. McGinn & M. Straughton  

Application of the method of manufactured solutions in code verification in geomechanics  
A. Khoshghalb, O. Ghaffaripour & K. Zamani  

Challenges in geotechnical design for infrastructure projects  
A. Clark & M. Dews  

Resilience approach to foundation design – A client’s perspective  
J. Kupec, D.P. Mahoney & R. Parish  

Design and construction of bored piles with friction-reducing sleeves in Mae Moh expansive soils  
C. Wongmahasirikun & P. Anantanasakul  

Site investigation and numerical modelling for a high bay distribution centre in Melbourne  
Y. Bai & A. Salim  

Arncliffe Ventilation: Challenges of a complex excavation system  
A. Lippet & D. Oliveira  

Geotechnical design and construction considerations for Old Mandurah Traffic Bridge Project  
S.K. Tan  

Soft ground instrumentation and data management for Woolgoolga to Ballina Pacific Highway upgrade  
P. Hewitt, H. Zhang & G. Yip  

Excavation directly beneath a heritage building with tight settlement limits, Sydney CBD  
M.L. Teoh, J.C.W. Toh & G. Fowlie  

Geotechnical impact assessment of a twin rail tunnel and instrumentation monitoring of a multi-storey development at Sydney  
Y. Arumugam & H. Chow  

Implementation of a successful geotechnical instrumentation and monitoring scheme in urban tunneling project – A case study of Forrestfield-Airport Link project, Perth, Western Australia  
S. Ganguly & P. Scott  

Construction of large span shallow tunnels: A case study from the New M5  
R. Anderson, D. Oliveira & S. Sang  

Geotechnical basics – Common practices to avoid  
B.G. Look  

Foundation analysis and ground improvement for industrial high-bay warehouse developments  
M. Haertsch, G. Mostyn & A. Salim  

Geotechnical design and construction of Chandler Highway upgrade project in Melbourne  
B. Lee & S. Sritar  

Reclamation of Pond F using the “sand raining technique” – A case history  
B.I. Thomas, B. Aery & S. Dahlhelm  

Role of the geotechnical engineer in a Delivery Partners’ team delivering a major infrastructure project - case example from Woolgoolga to Ballina Pacific Highway upgrade  
S. Aryal & D. Groth  

Ground models - Underappreciated, misunderstood and neglected, a plea for action  
K.J. Read & K.A.W. Lentfer
Integration of geotechnical models with data visualisation tools for the Ipswich Motorway Upgrade – Rocklea to Darra
A. Kemp, B. Look & D. Lacey

Challenges and opportunities in solar farm construction
R.E. Kristinof & B. Collingwood
