THIRD
AUSTRALIA — NEW ZEALAND
CONFERENCE ON
GEOMECHANICS

Wellington
May 12–16, 1980

Organised by
The New Zealand Geomechanics Society
Organisation Committee

CONVENOR
J. A. Webster
School of Architecture, Victoria University of Wellington.

FINANCE/NATIONAL COMMITTEE LIAISON
J. H. H. Galloway
Ministry of Works and Development, Wellington.

TECHNICAL PROGRAMME
M. J. Pender
Department of Civil Engineering, Auckland University.
G. Ramsay
Ministry of Works and Development, Wellington.

PUBLICITY
P. E. Salt
Ministry of Works and Development, Wellington.
T. J. Kayes
Tonkin and Taylor, Wellington.

SOCIAL PROGRAMME
P. Millar
Central Laboratories, Ministry of Works and Development, Lower Hutt.

Published by the New Zealand Institution of Engineers,
101 Molesworth Street, Wellington, New Zealand.

Responsibility for the contents of this volume rests upon the authors and not on the New Zealand Geomechanics Society or New Zealand Institution of Engineers.
Any portion of this publication may be reprinted provided the exact reference and source is quoted.

Printed by Bryce Francis Ltd, 11a Marion Street, Wellington.
Preface

The Third Australia New Zealand Conference on Geomechanics continues the sequence of conferences previously held in Melbourne (1971) and Brisbane (1975). The conference is related to the three main fields of geomechanics; soil mechanics, rock mechanics and engineering geology.

The conference is jointly sponsored by the New Zealand Institution of Engineers, The Institution of Engineers (Australia) and the Australasian Institute of Mining and Metallurgy and has been organised in conjunction with the Australian Geomechanics Society.

The conference proceedings are presented in three volumes, the first two volumes comprising papers submitted for presentation and the third volume reports of discussion at conference sessions and keynote addresses delivered by invited speakers. The papers are arranged in the two volumes in order of presentation at the technical sessions of the conference.

ERRATA

VOLUME I

Contents page:

i) The following paper was omitted:

Behaviour and design of housing slabs on filling
J.E. Holland and D.J. Climino; 1-25

ii) The page number for the paper by Williams and Ervin should be 1-115.

p 173 The figure in the third row of Table I for the upper 95% value of c' should be 207 not 39.

p 187 The vertical axis in figure 6 should be labelled with negative rather than positive values.

p 243 Para 3 line 12, should be 20 MPa
Para 3 line 14, should be 7 MPa
Para 7 line 1, delete 'and' from just record 'and' displacement.

p 245 Figure 4 - radial stress - \( \sigma_r \).
Circumferential stress - \( \sigma_\theta \).

p 246 Para 3 line 4 (Hughes, Wroth and Windle, 1977)
Para 5 line 2 should read 'The slope of this curve is a measure of the undrained shear strength.'
Para 7 line 4 ...or perhaps the in situ stress present in this rock is higher than was assumed for the determination...

p 254 Para 2 line 8 ...was less than the in situ pressure, the expansion...
