Table of contents

Introduction	XVII
 <i>Keynote papers</i>	
Geosynthetic-reinforced soil structures for transportation – from walls to bridges - <i>F. Tatsuoka</i>	3
The NZGS Geomechanics Award Lecture (2018) Some important considerations in the engineering assessment of soil liquefaction <i>M. Cubrinovski</i>	19
The AGS Practitioner Award Lecture (2016) Trying to make a difference – and why sometimes we can't <i>R.A. Day</i>	37
Dealing with the challenges of underground construction <i>O. Sigl</i>	43
Utility of critical state soil mechanics <i>M.G. Jefferies</i>	51
Effective communication to manage geotechnical risk <i>M.A. Woodward</i>	57
Unexpected ground movements and their impact <i>D.P. Stewart</i>	63
 <i>Theme 1. Site Investigation</i>	
Digital geological field data capture and analysis tool <i>C. Gibbons, O. Hoel, L. Glasson, S. Yorke & C. Mangos</i>	77
Assessing expansive soil risk using remote sensing <i>R.C. Roberts, L. Ge, Z. Du & N. Khalili</i>	83
The use of ground penetrating radar to identify karst terrain features in the Northern Territory <i>B.I. Thomas & D.P. King</i>	89
The legacy of geotechnical information from the Brisbane Airport Link and Northern Busway project <i>T. Thompson</i>	95
Geotechnical investigation and design of aerodrome pavements in saline and expansive subgrade conditions in South Australia <i>S. Ellis & S. Chakrabarti</i>	101
Development of a safety dynamic cone penetrometer <i>S.J. Clarke</i>	107
Calibration of the helical probe test <i>R. Kelly, B. Morris, K. Kianfar, A. Uhrig, R. Beeston & L. Bates</i>	111
Influence of distance-weighted averaging of site investigation samples on foundation performance <i>M.P. Crisp, M.B. Jaksa & Y.L. Kuo</i>	117

The determination of undrained shear strength of overconsolidated UK clays by means of Standard Penetration Test (SPT) <i>A. Petty</i>	123
A study on the estimation of frozen depth considering material characteristics <i>Y.S. Kim & S.S. Hong</i>	129
Application of the pressuremeter test in ground improvement <i>B. Hamidi</i>	135
Dynamic characterisation of Auckland City reclamation zones <i>K. Lee & L.M. Wotherspoon</i>	141
Yield stress relationships from CPTu for Brisbane Holocene clay <i>G.A. Hackney, D.J. Cunliffe & J.W.R. Dawes</i>	147
Multidisciplinary site investigations: geophysical techniques for comprehensive site characterisation and assessment <i>A. Pancha, B.J. Dixon & R. Apperley</i>	153
Best practices and benefits of borehole imaging in geotechnical site investigations <i>T.I.H. Rahiman & M.C. Harris</i>	159
A comparative study between CPT/SDMT data and MASW <i>G.J. Burton, O.P. Buzzi, L. Bates & A. Gomez</i>	165
Application of innovative geophysical methods to assess reclamation capping <i>R.G. Rayner, T.I.H. Rahiman, A. Purwodihardjo, N. Honeyfield & S. MacDonald</i>	171
 <i>Theme 2. Soil Mechanics</i>	
Mechanical behaviour of intact and remoulded calcareous silts <i>G.T. Lim, N. Boukpeti, A. Fourie, J.A. Pineda & J.A.H. Carraro</i>	179
The strength of Perth sands in direct shear <i>M. R. Jensen, V. Zania, B.M. Lehane, Q. Liu & C. Butterworth</i>	185
A comparison of finite difference with conventional limit equilibrium in embankment design <i>S. Sadeghifard & I. Antonopoulos</i>	191
An importance of cyclic principal stress rotation as induced by railway loads <i>K. Thevakumar & B. Indraratna</i>	197
Combination numerical technique of particle-based method and mesh-based method for large deformation analysis of geomaterials <i>T. Kiriya & Y. Higo</i>	203
Mathematical principle underlying the state-dependent stress-dilatancy of granular soil <i>C. Chen & Y. Sun</i>	209
Influence of intermediate principal stress on stress-strain and strength behaviour of silt-clay transition soils <i>P. Intharachart & P. Anantanasakul</i>	213
Direct shear behaviour of gravel-granulated tyre rubber mixtures <i>G. Chiaro, A. Palermo, G. Granello & L.J. Banasiak</i>	221
An elasto-plastic constitutive model for the analysis of bonded geomaterials <i>H. Moghaddasi, M. Khoshini, A. Khoshghalb, N. Khalili</i>	227
A critical state approach for liquefaction evaluation of sands containing fines <i>M.A.L. Baki, A. Gorczynska & M.M. Rahman</i>	233

Temperature response in permafrost at Dasan Station, Arctic <i>S.S. Hong & Y.S. Kim</i>	239
Design and application of a high-performance true triaxial stress cell <i>A. Rezagholilou, S. Fallahzadeh, N. Nourifard, S. Tehrani, N. Tarom & M. Sarmadivaleh</i>	243
 <i>Theme 3. Foundations</i>	
Settlement of a multi-storey carpark structure on Perth sand <i>D.P. Stewart</i>	249
Cyclic capacity of dynamically installed anchors and plate anchors in clay <i>L. Zang, S.H. Chow, C.D. O'Loughlin, J. Orszaghova, R. D. Beemer & H. Wolgamot</i>	255
Design, driveability, driving and dynamic testing of large diameter close ended steel tube piles for a pedestrian bridge <i>S.K. Tan & G.A. Chapman</i>	261
Predicting in-ground buckling instability of the steel H-beam pile through nonlinear analysis <i>C. Lee, C. Ng & R. Kelly</i>	267
Pile analysis and design for Optus Stadium <i>K. L. Cook, M. Hodder & S. McGinn</i>	273
Foundation design lessons from petroleum industry to offshore wind turbine <i>A. Rezagholilou, B. Jayakumar & A.B. Rodriguez</i>	279
The design evolution of replacement motorway bridge approach embankments <i>N. Campbell & C. Bridges</i>	285
Investigation and testing of short tension piles installed in Calcrete <i>J. Surjadinata, A.B. Nguyen, T. Whiting & J. His</i>	291
Key elements for the reliable assessment of driven pile capacity <i>B.G. Look, A. Kemp & J. Seidel</i>	297
Design and construction challenges of cast-in-place piles in weak rock for a bridge structure at the Gateway Upgrade North Project <i>O. Craciun, C.A. Bridges, R.J. Martin & J. Boyle</i>	303
Adding new levels to old buildings: A case study in foundation assessment <i>S. Colls</i>	309
A review on pile setup and relaxation in layered soils in various Highway projects in New South Wales <i>T.A. Peiris, K.F. Chan & F. Siahaan</i>	315
Effects of basement resistance on tall building foundation behaviour <i>H.S.W. Chow & H.G. Poulos</i>	321
Application of Fibre Bragg Grating sensor in mini pile performance and behaviour monitoring <i>C.F. Tsang, A. Mehdizadeh, G. Narsilio & M. Disfani</i>	327
Numerical modelling of ram-compacted bearing base piles <i>Z. Du, M. Walske, M.A. Shahin & B. Ghadimi</i>	333
Shaft capacity of non-displacement piles in silts and clays <i>L.V. Doan & B.M. Lehane</i>	339
Plugging, set-up effects and load capacity of open-ended pipe piles <i>S.T. Srithar</i>	345
A discussion on piling supervision for rock socket design verification <i>K.M. Farry</i>	351

Lateral pile analysis based on subgrade reaction and comparison with other methods <i>Y. Gong & D. Wang</i>	357
Geotechnical investigation and design of Cape Lambert dolphin piles <i>Y.K. Liew, J. Fong, S. Begg, D.P. King & A. Slade</i>	363
Foundation design and performance of 8,300 tonne storage tanks in Kwinana, WA <i>J.K. Lim, L. McDonald & M. Woodward</i>	371
Base grouting of bored piles on the Hamilton Section of the Waikato Expressway Project <i>G. Alexander, H. Wick & T. Pervan</i>	377
Transmission Gully Bridge 20 temporary works <i>S.J. Clarke, T. Rutherford, M. Salcher, M. Habte & C. McColgan</i>	383
Back analysis of an instrumented CFA pile in Perth sand <i>D.P. Mills & C.S Butterworth</i>	389
Base cleanliness of bored piles revisited – a case study <i>W.L. Chong, X. Le & S. Rex</i>	395
Foundation re-use and evaluation of geotechnical parameters for foundations in Sydney Sandstone <i>P.A. O'Brien & D.W. Airey</i>	403
Uplift capacities of vertical double-plate anchors in sand <i>V.B. Tilak & N.K. Samadhiya</i>	409
Foundation underpinning for the upgrade of aged culvert under the carriageway of a heavily-trafficked road <i>F.R. Siahaan, T. Muttuvel & A. Hubaut</i>	415
Pile design using CPT results: the “LPC method” <i>F.A. Verheyde & F. Baguelin</i>	421
Lateral soil displacement resulting from the installation of CFA piles in soft marine clays <i>J. Fetherston, R. Flynn & W. Chong</i>	427
 <i>Theme 4. Retaining Structures</i>	
The effect of the in-situ stress field on basement performance – a case study from Sydney, Australia <i>A.L.E. Lochaden, C.M. Haberfield & B. Francis</i>	435
Design charts for lateral deflection of embedded cantilever walls in unsaturated Perth sands <i>B.M. Lehane, A. Bagbag, C. Durham & T. Pine</i>	441
Retaining wall design in expansive clay for the Darlington Upgrade Project <i>S.T. Wong & S. Cowan</i>	447
Assessment of strut load redistribution due to removal of individual strut of an excavation support <i>V. Tandjiria & K.C. Chew</i>	453
An innovative approach to modelling braced retention systems in Plaxis <i>M.A. Khan, S. Maqbool & L. Lu</i>	459
Lateral load - Deflection profile of cantilever sheet pile wall <i>Aparna & N. K. Samadhiya</i>	465
Investigation of corner effects of deep excavations using the combination of soil nailing and ground-anchors methods <i>A.A. Zad & M. Mohammadi Hejr</i>	471

Back analysis of an instrumented cantilever diaphragm retaining wall in layered soils <i>C.S. Butterworth & H.S. Phadnis</i>	477
What you design is what you get – An economical way to the stability design of propped cantilever walls <i>C.K.S. Yuen</i>	483
 <i>Theme 5. Slopes</i>	
Massive landsliding in Narrabeen sandstones in the Watagan region <i>S.G. Fityus, P. Flentje & R. Rigby</i>	491
Judgements of landslide frequency and their effects on risk assessment in the coastal dune systems of south east Queensland <i>I.C.F. Shipway & D. Cooper</i>	499
Implications of groundwater pressure models for slope stability assessment <i>J.V. Simmons</i>	505
Slope failure risks by engineering geological logic and the simplified step path method <i>N. Bar & N.R.P. Baczynski</i>	511
Understanding the mechanisms of a large slow-moving landslide in the Manawatū gorge, New Zealand <i>A. Punt, P. Robins, P. Wopereis & R.I'Anson</i>	517
Structural solution for the stabilisation of a major highway slope – a case study from regional New South Wales <i>S. Aryal & H. Zhang</i>	523
Probabilistic approach for berth slope instability risk assessment: case study for Port of Brisbane quay line <i>J. Alinur, A. Purwodihardjo & N. Honeyfield</i>	529
 <i>Theme 6. Soft Soil Engineering</i>	
Preloading of deep soft foundation for an Administration Building of Container Terminal at Melbourne <i>K. Chen & G. Hunter</i>	537
Performance of embankment on soft soil facilitated with Prefabricated Vertical Drains (PVDs) under surcharge preloading at National Field Testing Facility (NFTF) <i>P. Baral, B. Indraratna & C. Rujikiatkamjorn</i>	543
Comparison of surcharge and vacuum pressure effects on radial consolidation <i>K. Kianfar, B. Indraratna & C. Rujikiatkamjorn</i>	549
Lessons learned from the geotechnical design and construction of a temporary bridge on soft ground <i>H. Zhang</i>	555
Sportsmans Creek Bridge - Approach embankment design and construction over 30 m thick alluvial flood plain <i>V. Nguyen, P. Wong & G. Rayward</i>	559
Design techniques drawn from the prediction of embankment behaviour on PVD improved Ballina clay <i>B. Poon, K.F. Chan & D. Perera</i>	565
Surcharge design using a probabilistic framework <i>K. Biram</i>	571

Case studies of an innovative ground improvement method - High vacuum densification method <i>R. Zhong & F. Haryono</i>	577
The Hunter Expressway Buchanan soft soil problem – what to do when settlement exceeds expectations <i>R. Kingsland, H. Zhang, V. Urbano, C. McCallum & A. McCann</i>	583
2D numerical modelling of sand compaction pile in soft soil under railway embankment <i>M. J. Alam & M. Islam</i>	589
Consolidation and creep settlement of Ballina soft soils <i>H.D. Subasinghe, M.A. Khan & M.P. Dineshharan</i>	595
Bund stability analysis at Lyttleton Port, NZ expansion project <i>A. Hutchinson, C. Thompson & C. Dai</i>	601
Instability of fill embankments on soft marine sediments during construction and remediation <i>B. Aery, J. Davis & A. Kemp</i>	607
Estimation of creep settlement reduction due to surcharging using commercially available software <i>V. Tandjiria & D. Andrew</i>	615

Theme 7. Offshore and Marine Geotechnics

Design and installation of mobile offshore drilling unit mooring piles using innovative drive-drill-drive techniques <i>I. Finnie, R. Gillinder, M. Richardson, C. Erbrich, M. Wilson, F. Chow, M. Banimahd & S. Tyler</i>	623
The Maari WHP foundation – Design, installation and performance <i>P.G. Watson, G. Jackson & C. Humpheson</i>	635
Suction bucket foundations for offshore renewable energy installations <i>B. Bienen, R. Ragni, N. Fiumana & C. Gaudin</i>	641
Remediating contaminated marine sediments using a mudcrete reclamation <i>W.D. Thorburn & G.B. Farquhar</i>	647
SH1 Realignment – Optimisations and innovations on new MSEW Seawalls <i>I. Antonopoulos, C. McDermott & S. Karmacharya</i>	653
An assessment of the traditional geotechnical design method for cyclic loading of shallow foundations <i>D. Zografou, S. Gourvenec, C.D. O’Loughlin & M. Banimahd</i>	659
Performance of coastal structures: A case history comparison between MSEW (seawall) and RSS (embankment), Canterbury, New Zealand <i>S. Sadeghifard & I. Antonopoulos</i>	665
Full scale field trials of a MSEW - Mass concrete block facing seawall connection system <i>C. McDermott, I. Antonopoulos & H. MacMurray</i>	671
Mooring of wave energy system using dynamically installed anchors <i>S.H. Chow, A. Verth, L. Zang, J. Orszaghova, R. Bradley, H. Wolgamot & R.D. Beemer</i>	679
Estimating the drained friction capacity of pipelines on mobile seabeds <i>J.G. Tom, T.J. Griffiths, D.J. White & S.H.F. Leckie</i>	685

Theme 8. Ground Improvement

Design of a reinforced soil capping beam over a soil-bentonite barrier wall <i>S.J. Goodall</i>	693
--	-----

Effects of asperities on the geotextile-geomembrane interface shear characteristics <i>D.D. Adeleke, D. Kalumba & P. Hardie</i>	699
Microscopic investigation of interparticle-interaction between sand particles and biopolymer <i>S. Lee & I. Chang</i>	705
Working platforms for tracked plant – BR 470 guideline and a revised approach to stabilisation design with multiaxial hexagonal geogrids <i>M.J.D. Dobie, A.S. Lees, J. Buckley & R. Bhavsar</i>	709
Geotechnical treatment of a brownfield site with compressible soils for a residential redevelopment in Port Adelaide, South Australia, using a performance-based design and observational approach <i>M. Lee & V. Blanchet</i>	715
Polymer addition to enhance healing and self-healing of kaolin clay <i>S.Z. Chen, Y.X. Gan & D.W. Airey</i>	721
Ground improvement of an old quarry (landfill) using dynamic compaction methods <i>J. Zeerak, A. Garrard & A. Abou Antoun</i>	727
Geotechnical aspects and monitoring of ground treatment for Nundah Creek bridge approach embankments <i>M. Phillipson, J. Alinur & N. Manche</i>	733
Wide range of application of ground reinforcement by means of rigid inclusions in foundation works <i>M. Krzeminski & E. Lin</i>	739
Ground modifications using mass soil mixing technique in geotechnical engineering <i>M. Krzeminski & M. Lai</i>	745
Utilising novel green binders in ground improvement applications <i>M. Yaghoubi, A. Arulrajah, M.M. Disfani, S. Horpibulsuk, S. Darmawan & M.W. Bo</i>	753
Bridging sinkholes using geosynthetic reinforcement <i>N. Sasiharan, R.S. Merifield & A. Middleton</i>	759
Optus Stadium enabling works ground improvement <i>B. Hamidi</i>	765
Optimisation of bridge approach embankments and retaining wall foundations design using wet soil mixing ground treatment <i>A.H.M. Kamruzzaman, B.R. Thomas, L. Tram & K.F. Chan</i>	773
Artificial ground freezing application for tunnelling works in Hong Kong <i>C.K. Tsang, H.Z. Yu, C.S. Kong & A. Hu</i>	779
Stabilization/solidification of incineration fly ash (IFA) in cement-stabilized clay <i>W. Li, Y.J. Ong & Y. Yi</i>	785
Advancements in track technology: Use of artificial inclusions for stabilising transport infrastructure <i>B. Indraratna, T.N. Ngo & F. Ferreira</i>	791
Influence of soil clogging on the performance of jute fibre drains installed in Ballina clay <i>T. T. Nguyen, B. Indraratna & J.P. Carter</i>	797
Measurement of subsurface vibrations during sinkhole remediation by vibrocompaction, Alkimos, Perth, WA <i>A. Websper, D. Wade, M. Lai & S. Masterson</i>	803
Building on soft ground: a case study in Tauranga, New Zealand <i>D. Sandilands & B. O'Loughlin</i>	809

Comparing the relative merits of dynamic compaction, rapid impact compaction and impact rolling <i>D. Avalle, B. Scott & A. Bouazza</i>	815
 <i>Theme 9. Rock Mechanics</i>	
Experimental analysis of rock stiffness degradation due to the cyclic loading <i>M. Ghamgosar</i>	823
Mechanical characterisation of a highly friable weak sandstone <i>M. Khoshini, A. Khoshghalb, H. Moghaddasi & N. Khalili</i>	829
Experimental study on influence of impact angle on fragmentation of brittle blocks upon dynamic impact <i>D.E. Guccione, S. Fityus, N. Gregg, A. Giacomini & O. Buzzi</i>	835
Effect of cryogenic thermal exposure on geomechanical rock properties <i>M.Z. Rasheed, S. Khan & N. Tarom</i>	839
Ground response due to temporary pillar removal in motorway caverns in Sydney sandstone <i>M. Salcher, T. Nash, A. de Ambrosis & C. Grabham</i>	845
A study of the sensitivity of rolling behaviour to block shape <i>M. Mousakhani, S. Fityus, R. Ruaia & A. Giacomini</i>	859
Torlesse rock mass classification system and structural regimes for rock engineering – Wellington, New Zealand <i>R. Cammack, T. Rutherford, M. J. Eggers & B. Rouvray</i>	865
Deterioration of sandstones and shales in Sydney tunnels <i>T. Nash, R. Bertuzzi & A. de Ambrosis</i>	877
Acoustic approach to determine Biot effective stress coefficient of sandstone using true triaxial cell (TTSC) <i>H. Salemi, N. Nourifard, S. Iglauer, A. Rezagholilou & M. Sarmadivaleh</i>	883
Coupled discrete element and finite difference modelling of wave propagation across rock mass considering multiple reflections between ground surface and joint <i>B. Huang & B. Fatahi & S. Zargarbashi</i>	889
 <i>Theme 10. Mining Geotechnics</i>	
Geotechnical management of large scale slope deformations at the Teal Gold Project, WA <i>J.W. Watton & M.J. Fowler</i>	897
Operational and construction impacts on GCL performance in TSFs <i>E.J. Boczek & M. Amtsberg</i>	903
Investigation of shallow mine workings for the proposed Newcastle Light Rail Project <i>D.L. Knott, A. Hitchon & R.I. Kingsland</i>	909
Improving workability of cement paste backfill using new binders <i>A. Taheri, Y. Zhao, A. Soltani, M. Karakus & A. Deng</i>	917
Engineering geological modelling of the Archean – Cenozoic unconformity in the Pilbara and implications to open pit slope design <i>D.J. Hemraj</i>	923
Instrumented column testing of settling, consolidation and desiccation of coal tailings slurry under ambient weather conditions <i>C. Zhang, X. Lei, S. Quintero, D.J. Williams & S. Jensen</i>	931

Regional subsidence in the Latrobe Valley after mine rehabilitation <i>E. Waghorne, G. Foley & M. Disfani</i>	937
A foundation investigation to consider the potential for a ‘Mt Polley’ type slope failure <i>B.P. Cummins, R. Fanni & P.J. Chapman</i>	943
Shallow mine subsidence – A Case Study <i>J. Johnston & S. Fityus</i>	949
Managing the risk between historic underground workings and an active open pit using geotextile and SMART markers <i>S. Nicoll, P. du Plessis, F. Pothitos & N. Bar</i>	955
 <i>Theme 11. Earthworks and Pavements</i>	
Inland Rail – Earthworks value engineering <i>M. Drechsler, R. Kelly, A. Newson, S. Sawtell & T. Neville</i>	963
Weak subgrade treatment using geogrid reinforcement <i>A. Shahkolahi, J. Klompaker & D. Lacey</i>	967
Application of Li and Selig railway formation design method to expansive soil <i>V. Blanchet, Y.W. Tun, L. Yang & E. Lo</i>	973
Stress distribution in multi-layered railway formation and subgrade <i>L. Yang, E. Lo, V. Blanchet & Y.W. Tun</i>	979
Characterisation of natural bauxite materials for use in remote sealed road pavements in Australia <i>S. Chakrabarti, P. Klibbe & B. Zeith</i>	985
Effect of construction traffic on sealed crushed limestone pavement overlying sand subgrade in Western Australia <i>S. Chakrabarti, G. Singh & T. Chua</i>	991
Use of C_a / C_c ratio as a criterion for cementitious stabilization of highly organic subgrade soils <i>A. Sarsour, K. Sobhan, B.M. Das & S.K. Shukla</i>	997
The effect of impact roller compaction on closed landfill settlements <i>M. Alibeikloo & H. Share Isfahani</i>	1003
Analysis of flexible pavement structural responses under the falling weight deflectometer <i>A. Sawangsuriya, S. Yindeesuk, K. Kanitpong & H. Sudajan</i>	1009
Shear parameters and resilient moduli response of steel slag aggregates as pavement materials <i>F. Maghool, A. Arulrajah & S. Horpibulsuk</i>	1015
 <i>Theme 12. Unsaturated Soils</i>	
Design and construction of soil nail wall on the basis of unsaturated soil mechanics <i>B. Poon, P.W. Mitchell, D. Oko-Oboh & M. Pham</i>	1023
Investigation of the effect of initial water content and surcharge on volume change behaviour of compacted grey vertosol <i>R.S. Udukumburage, C. Gallage & L. Dawes</i>	1029
Incorporation of the stabilising effects of soil suction in railway embankments <i>G. Swarbrick & W. Piper</i>	1035
Design and construction of cost-effective 60° revetment walls in unsaturated clay <i>S. Pointon, P. Gibbons & S. Cowan</i>	1041
Cyclic consolidation response of clays using Bounding Surface Plasticity model <i>G.A. Esgandani, B. Shahbodagh, A. Khoshghalb & N. Khalili</i>	1047

Re-assessment of TMI based climate zones in metropolitan Perth, WA <i>Y. Hu, A.C. Raj, G. Cocks & F. Verheyde</i>	1053
Moisture and suction changes pre and post construction in expansive clays during recent extreme climate <i>D. Lopes, A.M.A.N Karunaratne & R.I. Brown</i>	1059
Using soil moisture retention curves and corrosimetry to characterise the role of soil moisture in underground corrosion <i>R.M. Azoor, R.N. Deo, B.M. Shannon, J.K. Kodikara</i>	1065

Theme 13. Seismic Engineering

Liquefaction resistance of Christchurch sandy soil deposits obtained from cyclic direct simple shear tests and CPT-based methods <i>C. Cappellaro, M. Cubrinovski, G. Chiaro, M.E. Stringer, J.D. Bray & M.F. Riemer</i>	1073
Site characterisation and liquefaction assessment for the reclaimed soils in CentrePort, Wellington <i>R. Dhakal, M. Cubrinovski, C. de la Torre & J.D. Bray</i>	1079
Insights into the liquefaction hazard in Napier and Hastings based on the assessment of data from the 1931 Hawke's Bay, New Zealand, earthquake <i>M. El Kortbawi, R.A. Green, L. Wotherspoon & S. van Ballegooy</i>	1087
Influence of corrections to recorded peak ground accelerations due to liquefaction on predicted liquefaction response during the Mw 6.2, February 2011 Christchurch earthquake <i>S. Upadhyaya, R.A. Green, A. Rodriguez-Marek, B.W. Maurer, L. Wotherspoon, B.A. Bradley & M. Cubrinovski</i>	1093
Sensitivity of ground response analysis to dynamic soil models implemented in soft soil deposits <i>R. Meite & L. Wotherspoon</i>	1099
Dynamic replacement - Liquefaction mitigation for Hamilton section of Waikato Expressway <i>P.K. Wong, V. Jeyakanthan & S. Raathiv</i>	1105
Motorway cut slope and foundation treatment design and construction over loose ground susceptible to liquefaction <i>C. Dai, D. Sullivan & S. Raathiv</i>	1111
Case study - mitigating the effects of liquefaction to Christchurch Rugby League Park Stadium grandstand footing foundation: design and construction observation <i>J.O. Owusu & R.W.M. Lo</i>	1117
A fully coupled non-linear dynamic analysis procedure and its verification using benchmark boundary value problems <i>M.E. Kan & N. Khalili</i>	1123
Effect of static loading on cyclic liquefaction behaviour: a DEM study <i>R. Kolapalli, M.M. Rahman, M.R. Karim & H.B.K. Nguyen</i>	1129
The performance of modular block walls reinforced with geogrid subject strong ground motions during the 2016 Kaikoura earthquake <i>G.R. Stevens & M.J.D. Dobie</i>	1135

Theme 14. Case Histories

Collapse of the Old Pacific Highway, Piles Creek, Somersby <i>S.J. Clarke, G. Mostyn & B. Shen</i>	1143
---	------

Some geotechnical lessons learned on foundation construction of Sydney's tallest building, Crown Sydney Hotel Resort <i>B. Azari, S. Mirlatifi, H. Buys & I. Cullen</i>	1157
Geotechnical interfaces on Optus Stadium <i>K.L. Cook, S. McGinn & M. Straughton</i>	1163
Application of the method of manufactured solutions in code verification in geomechanics <i>A. Khoshghalb, O. Ghaffaripour & K. Zamani</i>	1171
Challenges in geotechnical design for infrastructure projects <i>A. Clark & M. Dews</i>	1177
Resilience approach to foundation design – A client's perspective <i>J. Kupec, D.P. Mahoney & R. Parish</i>	1183
Design and construction of bored piles with friction-reducing sleeves in Mae Moh expansive soils <i>C. Wongmahasirikun & P. Anantanasakul</i>	1189
Site investigation and numerical modelling for a high bay distribution centre in Melbourne <i>Y. Bai & A. Salim</i>	1197
Arncliffe Ventilation: Challenges of a complex excavation system <i>A. Lippet & D. Oliveira</i>	1203
Geotechnical design and construction considerations for Old Mandurah Traffic Bridge Project <i>S.K. Tan</i>	1211
Soft ground instrumentation and data management for Woolgoolga to Ballina Pacific Highway upgrade <i>P. Hewitt, H. Zhang & G. Yip</i>	1217
Excavation directly beneath a heritage building with tight settlement limits, Sydney CBD <i>M.L. Teoh, J.C.W. Toh & G. Fowlie</i>	1223
Geotechnical impact assessment of a twin rail tunnel and instrumentation monitoring of a multi-storey development at Sydney <i>Y. Arumugam & H. Chow</i>	1229
Implementation of a successful geotechnical instrumentation and monitoring scheme in urban tunneling project. – A case study of Forrestfield-Airport Link project, Perth, Western Australia <i>S. Ganguly & P. Scott</i>	1235
Construction of large span shallow tunnels: A case study from the New M5 <i>R. Anderson, D. Oliveira & S. Sang</i>	1241
Geotechnical basics – Common practices to avoid <i>B.G. Look</i>	1247
Foundation analysis and ground improvement for industrial high-bay warehouse developments <i>M. Haertsch, G. Mostyn & A. Salim</i>	1253
Geotechnical design and construction of Chandler Highway upgrade project in Melbourne <i>B. Lee & S. Srithar</i>	1259
Reclamation of Pond F using the “sand raining technique” – A case history <i>B.I. Thomas, B. Aery & S. Dahlhelm</i>	1265
Role of the geotechnical engineer in a Delivery Partners' team delivering a major infrastructure project - case example from Woolgoolga to Ballina Pacific Highway upgrade <i>S. Aryal & D. Groth</i>	1271
Ground models - Underappreciated, misunderstood and neglected, a plea for action <i>K.J. Read & K.A.W. Lentfer</i>	1277

Integration of geotechnical models with data visualisation tools for the Ipswich Motorway Upgrade – Rocklea to Darra <i>A. Kemp, B. Look & D. Lacey</i>	1283
Challenges and opportunities in solar farm construction <i>R.E. Kristinof & B. Collingwood</i>	1289
